TECHNICAL BULLETIN

FCPS-24 and FCPS-24C Discontinued

August 22, 2005

Document TB05-08-02

The FCPS-24 and FCPS-24C power supplies will be discontinued as of September 30, 2005. The replacement for the FCPS-24 will be the FCPS-24S6 and FCPS-24S8 power supplies.

The FCPS-24S6 and FSPS-24S8 power supplies, rated at 6 and 8 amps respectively, are based on the design of the FCPS-24 and include built in strobe synchronization for System Sensor, Wheelock and Gentex. Many of our customers have already switched over to these newer supplies, enjoying the benefits of built in strobe synchronization, and the additional power provided by the FCPS-24S8.

While we encourage our customers to purchase the new and improved power supplies, please anticipate any future needs for the FCPS-24 and FCPS-24C and place your final orders by September 30, 2005.

We appreciate your cooperation during this transition. In the meantime, should you have any questions regarding this notice, please feel free to contact your Regional Sales Manager, Technical Service or NOTIFIER Customer Service Representative.
