

what came first?

Long before other security manufacturers began hatching imitations, Honeywell's DUAL TEC® (DT) Series Sensors set the standard in its class, with the combined strength of microwave and PIR technologies providing superior detection and false alarm immunity. And although we pioneered the technology and trademarked the name, it didn't stop the competition from introducing "dual technology" sensors to compete directly with the original –

making ours the most copied motion detector in the world. Can't say we blame them for trying. But why settle for the imitators when you can have the innovators?

The original DUAL TEC. It's everything it's cracked up to be.
