

infinite access

Simple and scalable access control solutions from Honeywell - no matter the size or complexity.

Give your customers infinite possibilities with Honeywell access control solutions that suit any budget and need. Our reliable WIN-PAK platform, including entry level to fully integrated solutions, provides a single scalable and backward compatible solution that can adapt as businesses evolve. Installation is easy, training is minimised and it has low cost of ownership, and all from one trusted provider. Small businesses looking to improve building security can

also take advantage of web-based NetAXS-123 with event-driven recorded video. It's simple to install and use, and extremely affordable as USBs replace the need for dedicated video recording hardware. It's ideal for remote sites as events can be viewed live from up to four cameras.

Explore infinite opportunities with Honeywell Access Control Solutions.
