

# shattered

**It's time the myths about glassbreak detectors were shattered.**

Thanks to Honeywell's FlexGuard® technology, today's glassbreaks are so incredibly reliable, they can and should be used on every job. In fact, more dealers rely on the IntelliSense FG-1625 Series as a first line of defense for their customers because they keep intruders where they belong... outside. Millions are installed worldwide, operating trouble-free.

When it comes to precision, performance and false alarm immunity, it shatters every other glassbreak on the market.
