

Protecting People, Property and Assets... in the Cloud

It's not an option—it's a must. In an age when digital video recorders can fail without knowledge of it or onsite video storage can be stolen or vandalized, don't take the risk. Trust in the reliability of hosted video storage.

MAXPRO® Cloud | Anytime, Anywhere

WATCH YOUR BUSINESS

View live and recorded video from a PC, Mac, tablet or smartphone wherever Internet access is available.

PROTECT YOUR INVESTMENT

Maximize investment now and in the future because the system grows as business needs grow.

Manage video from one or more locations remotely

Receive real-time alerts of alarms and events requiring attention

No special IT skills required to access video outside a company firewall

Scalable storage options to buy what is needed – when it is needed

Get automatic software updates of new features without fees

Leverage existing equipment and add newer technology as needed

PEACE OF MIND

Relax. Recorded video will be there – 24/7/365.

Monitor system performance with instant notification of camera failure

Store data locally or in the cloud –improve video reliability

Secure login allows only authorized users access to video
