

# easy

## Honeywell NetAXS-123 gives you easy access control in one system.

NetAXS-123, the latest in our innovative range of stand alone web-based access control products, is a compact one, two or three door system. Its modular design makes adding doors easy and affordable, from a single door up to 93 in one system. And being web-based means fewer costs to operate – there is no need for a dedicated PC running 24/7 or for a network. The

web browser functionality ensures convenient, easy operation and if connected to a network you can carry out service calls remotely saving you time. ***Easy to install, operate and maintain, it's exactly what access control should be – easy!***
