Product Profile ONYX® Marine Systems

The NOTIFIER ONYX® Marine series fire alarm system delivers the finest life safety protection for a wide range of marine applications from support craft and luxury yachts, to oil platforms and large ships.

NOTIFIER's marine solution meets regulatory and insurance requirements and have advanced features required for the demanding operating environments of ships and oil platforms. With FLASHSCAN protocol, ONYX® Marine panels communicate rapidly with hundreds of intelligent sensors and notification devices, responding to your emergency within seconds of detection. Noti-Fire-Net™ adds unmatched capabilities for networking ONYX® panels with fast, flexible options.

APPLICATIONS

Applications for ONYX® Marine systems are varied, ranging from ships to yachts. Ships, ferries, tankers, barges, tug boats, support craft, and oil drilling and pumping platforms are all protected by Notifier ONYX® Marine systems. Along with listed ONYX® controls, a full array of compatible intelligent sensors and peripheral devices are approved for marine applications, providing the system designer with multiple options for designing the best solution for every need.

NOTIFIER ENGINEERED SYSTEM DISTRIBUTORS

NOTIFIER's exclusive network of Engineered System Distributors (ESDs) have the expertise to install and program marine systems for a range of ships and platforms and keep them running for years so you have the protection needed. NOTIFIER ESDs are experienced with ONYX series controls and equipment, and will apply the right products for each application. Experienced system designers can take full advantage of flexible ONYX® system programming to provide solutions that accommodate special needs for marine applications.

For many situations, timely service is critical to the ship owners. When a ship with a damaged fire system docks, the system must be serviced or replaced before the ship will be allowed to depart.

For applications from basic to requiring large numbers of devices and sophisticated operations, NOTIFIER ESDs provide quality marine fire alarm solutions.

MARINE APPROVALS

NOTIFIER ONYX® control panels are approved by the US Coast Guard, Lloyd's Register, and ABS (American Bureau of Shipping), when used with approved devices:

- 1-loop NFS-320 and 1or 2 loop NFS2 640 controls panels (including all export versions of these panels)
- The 1 to 10 loop NFS2-3030 control panel ("M" version for English, and all export versions)
- Noti-Fire-Net™ – both standard and high speed versions

Contact your NOTIFIER Distributor for complete information on ONYX® Marine systems.

For over 60 years, NOTIFIER has been a leader in the fire alarm industry. Today, we are the largest manufacturer of engineered fire alarm systems with over 400 distributors worldwide, and regional support operations on every continent for the flexibility and options your business needs.

NOTIFIER - Leaders in Life. Safety. Technology.
