

“Partnering with Honeywell has been great. The products are excellent and they provide outstanding support.”

— Jim Marsen, Jones Food Store Equipment

Zero Disruption To Store Operation

Honeywell Genetron Performax[®] LT (R-407F) Refrigerant

THE CHALLENGE

Find a reduced-GWP alternative to R-22 that can be installed without disrupting store operation.

THE SOLUTION

Honeywell Genetron Performax[®] LT refrigerant worked as a drop-in replacement, plus it delivers improved performance for energy savings.

Excellent Retrofit Choice

From equipment installations to retrofits, Jones Food Store Equipment has been serving supermarkets in British Columbia, Canada, for more than four decades. They've recently been utilizing Honeywell refrigerants as the ideal solution for the phaseout of R-22.

“R-407F — Genetron Performax[®] LT — is a great fit for us and our customers,” notes Jim Marsen, Refrigeration manager for Jones Food Stores Equipment. “It performs very well, and we're also able to bring our customers the lowest-GWP HFC refrigerant available for their situation. We're very proud of that.”

Recent retrofits from R-22 to Performax LT have been smooth. “It's almost a direct drop-in,” said Marsen. “In fact, you might as well call it a drop-in. We expected to need a lot more adjustments, but some minor adjustments to the expansion valves were all we needed. Our customers have been thrilled because the retrofits are so seamless. We haven't had to disrupt their operation at all.”

Customers are also happy about the energy efficiency that Performax LT delivers. “Plus the reclaim heat is much better,” adds Marsen. “That makes a big difference in northern markets like ours, and it's another way that we're able to set our business apart and help our customers maximize value.”

Trusted Support

Marsen has been impressed by the relationship with Honeywell. “The refrigerants have us positioned for the future as more customers want to do more to help the environment and meet environmental regulations. Other suppliers are doing the bare minimum, but Honeywell is on the leading edge. We can bring our customers a sustainable solution that's also seamless to install. You can't beat that.”

Working with Honeywell has also been a breeze. “Honeywell's people have offered tremendous support,” said Marsen. “They're very helpful and are always there if we have questions. There's a great comfort level when working with them, and that gives our customers a high level of confidence, too.”

Proven In The Field

In the last 18 months, Jones Food Store Equipment has completed five supermarket retrofits using Genetron Performax LT. The process is so smooth that store employees and customers are often unaware that the retrofit is taking place. “Nothing makes our customers happier than a great solution that doesn’t disrupt their business,” notes Marsen.

Genetron Performax LT

- Best capacity match to R-22 in medium- and low-temperature applications
- The most efficient R-22 retrofit option in the marketplace
- Lowest GWP among HFC R-22 replacements for commercial refrigeration
- No TXV change or adjustments when retrofitting from R-22
- Compressor manufacturer approvals
- Lower discharge temperature than R-22
