**APPLICATIONS**

Honeywell Elster’s new RABO-Compact series, RABO-CT (Compact Thread) and RABO-CF (Compact Flange) are suitable for measuring of natural gas and various filtered, non-corrosive gases.

**BRIEF INFORMATION**

**General**

Honeywell Elster rotary gas meters are characterized by high measuring ranges and compact dimensions. They ensure high accuracy, even if the gas flow is low or irregular. RABO combines tried-and-tested product features of previous rotary gas meters from Elster-Instromet and is a convincing product because it offers a large range of future-oriented features.

**Operating Principle**

Rotary gas meters are volume-measuring devices for gaseous media which operate according to the positive displacement principle. Due to their volumetric measuring principle, their functioning is not influenced by the installation and they are therefore ideal for compact measuring systems housing without an inlet section. They record the gas volume under operating conditions and are approved for custody transfer applications. Electronic volume conversion devices can be used in order to convert the volume.

**Measurement Procedure**

Two rotating impellers which look like a figure of eight (8) when viewed in cross-section are mounted in a single housing with one inlet and one outlet. The two impellers are coupled together using synchronizing gears. When gas flows, the impellers rotate without touching one another and propel a gas volume to the outlet which is defined by the cyclic volume. One rotation of the system thus corresponds to a defined gas volume. The revolutions of the impellers are transferred to the mechanical index via a reducing gear and a magnetic coupler. The rotary gas meter is adjusted using a pair of gears in the index.

**FEATURES & BENEFITS**

- Meter sizes G10 to G40
- Flow rates from 0.25 to 65 m³/h
- Nominal sizes DN 25 to DN 50
- Pressure ratings PN 10/16 and Class 150 in accordance with ASME B 16.5
- Temperature range -25°C to +70°C
- Measuring ranges up to 1:200
- Aluminum housing as Flange or Threat version
- Compact dimensions
- Maintenance free option
- Index can be rotated for horizontal and vertical installation
- Optional index solutions (e.g. Absolute ENCODER S1D)
- Approvals pursuant to MID/ PED/ATEX Directives
### TECHNICAL DATA

- **Gas Temperature**
  - -25°C to +70°C
- **Ambient Temperature**
  - -25°C to +70°C
- **Storage Temperature**
  - -40°C to +70°C
- **Operating Pressure**
  - Max. 20 bar
- **Protection Class**
  - IP 67 (suitable for outdoor installation)
- **Housing CF**
  - Aluminum DN25-DN50
- **Housing CT**
  - Aluminum G1 ½"
- **Mid Approval**
  - DE-12-MI002-PTB001 (PTB)
- **Ped Approval**
  - CE-0085CN0022 (DVGW Cert GmbH)
- **Atex Approval**
  - Ex-zone 1

- **Medium**
  - Natural gas and various filtered, non-corrosive gases, Hydrogen (in preparation)

- **Metrological Accuracy Class**
  - AC 1.0

- **Reproducibility**
  - < 0.1%

- **Indexes**
  - S1V (standard), S2 (optional, no extra cost), Optional at extra cost: Absolute ENCODER S1D, double index S1D, double index MI-2D

- **Pulse Outputs**
  - LF pulser IN-Sx (reed contact, standard) in accordance with EC type-examination certificate TÜV 03 ATEX 2123
  - LF pulser IN-W11 (Wiegand sensor, optional) in accordance with EC type-examination certificate TÜV 01 ATEX 1776
  - HF pulser A1K (Namur sensor, optional) in accordance with EC type-examination certificate PTB 99 ATEX 2219X

* $Q_{\text{min}}$: ≤0.3 m³/h valid for temperature range from -10°C to +70°C

**Typical values, depending on test rig conditions
INDEXES

S1V Index (standard)
• 8-digit mechanical index
• Index can be rotated 350°
• Protection class IP 67
• Can be used as main index

S2 Index (standard)
• Top reading
• 8-digit mechanical index
• Index can be rotated 350°
• Protection class IP 67
• Can be used as main index

PULSE GENERATORS

Installation of the Pulser Module IN-S1x
• Slide the guides of the IN-S1x into the guide groove on the index cover
• Slide the IN-S1x over the safety catch on the index cover by applying slight pressure until the IN-S1x can be heard to engage

Removal of the Pulser Module IN-S1x
• Lift the lower catch of the IN-S1x using a screwdriver and pull gently out of the guide on the index cover.

LF Pulser E1 and PCM
Elster-Instromet rotary gas meters are fitted with 2 low-frequency (LF) pulsers E1 and a monitoring contact (PCM) for detection of interferences caused by external magnetic fields as standard. Pulser modules IN-S1x can be plugged on without opening the index and can be retrofitted or replaced at any time.

LF Pulser IN-W11
Elster-Instromet rotary gas meters can be optionally fitted with the LF Wiegand sensor module IN-W11 at the factory, instead of with the LF pulser module IN-S1x.

The IN-W11 is a low-frequency pulse generator with a defined pulse width for maximum reliability with no mechanical wear.

Characteristic data for the switch version in accordance with DIN EN 60947-5 (Namur):
