

## Connected OEM Quick Start Guide

CODOC-X779-en-R102.1

Revision 1, June 2022

### Overview

This document provides description and procedures for the quick start guide of Connected OEM.

Connected OEM is a solution on IIoT Technology. It is a Cloud based remote monitoring solution that securely connects equipment installed with Connected OEM data collectors and sensors, providing critical asset data and alarms on the Connected OEM mobile node and Connected OEM dashboard. It improves services responsiveness, equipment efficiency, and reliability.

A plug-and-play solution allows OEMs to monitor their equipment and increase the overall equipment effectiveness (OEE).

### Features

- Monitors the health condition of various geographically dispersed equipment.
- Generates customizable asset KPI dashboard using Connected OEM mobile node and Connected OEM dashboard.
- The offering is aimed to help OEMs to create new business models.
- KPI visualization dashboards will help users with faster business decisions, such as instrument repair or adjusting parameter settings to boost overall performance.
- Alarms and notifications will help OEM engineers/ site personnel timely address alarm circumstances.

## Reference Documents

For additional information, see the list of below documents.

Document Number	Document Name
CODOC-X780-en-R102.1	Connected OEM Installation and Troubleshooting Guide
CODOC-X781-en-R102.1	Connected OEM User Manual
Moxa OnCell 3120-LTE-1 Series	Moxa-oncell-3120-lte-1-series-qig

## Connected OEM Architecture

## Communication Enclosure arrangement

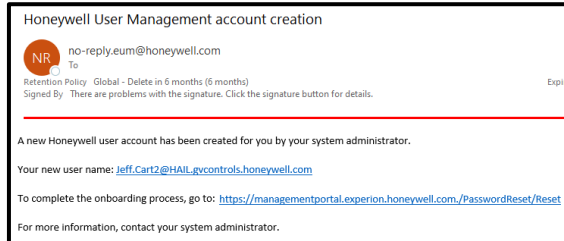

1. Circuit breaker
2. End bracket
3. Type 3 surge protection device (optional)
4. Power supply
5. Antenna (Internal or external options)
6. 5 Port Switch: Network Switch (Optional: When there are more than 2 ControlEdge devices)
7. Cellular Gateway

## Getting Started

### Prerequisites

1. OEM Admin creates an application account for users using the User Management portal.
2. The user receives an On-boarding email from OEM Admin with a User ID and link to complete the onboarding process.

## Specifications

### Qualified Data Collectors:

- ControlEdge PLC and ControlEdge RTU

### Qualified Gateway:

- Moxa OnCell 3120-LTE-1

### Min and Max Equipment Supported:

- As per SaaS Plan and Tiers

### Connectivity:

- Equipment Connectivity: Private Cellular Network (LTE)
- IIoT Protocol: MQTT with Sparkplug B
- Network Service Provider: Vodafone or Vodafone Partners

### Connected OEM Mobile Node Specifications:

- Minimum iOS Version 11 and above
- Minimum Android Version 6 and above

### Connected OEM Dashboard Specifications:

- Recommended browser: Google Chrome.

## Download and Install the Honeywell Connected OEM mobile node from iOS device

- Click the URL link or scan the QR code to download and install the app for iOS device.

	
URL	QR CODE
<a href="https://apps.apple.com/ch/app/honeywell-experion/id1286598854?l=en">https://apps.apple.com/ch/app/honeywell-experion/id1286598854?l=en</a>	

## Download and Install the Honeywell Connected OEM mobile node from Google play store

- Click the URL link or scan the QR code to download and install the app for Android device.

	
URL	QR CODE
<a href="https://play.google.com/store/apps/details?id=com.honeywell.operate">https://play.google.com/store/apps/details?id=com.honeywell.operate</a>	

## OEM User Onboarding

1. Open the email from OEM admin and click on onboarding process link.
2. Enter **Username** provided in the onboarding email and click **Next**. A link is sent over email to Reset password.

The diagram shows two screenshots of the 'Reset Password' process. The first screenshot is a form titled 'Reset Password' with the text 'Please enter your username'. Below this is a text input field containing the username 'Jeff.Carl@HAIL.gycontrols.honeywell.com'. At the bottom of the form are two blue buttons: 'Next' and 'Cancel'. A blue arrow points from this form to the second screenshot, which is a confirmation message box titled 'Reset Password' containing the text: 'An email has been sent to you to reset your password. Please check your inbox.'

3. Select Reset Password link.

The screenshot shows an email message with the following content:  
Hi Jeff Carl,  
We received a request to reset your password, click the link below to set a new password:  
[https://managementportal.experion.honeywell.com/PasswordReset/Password\\_reset/?email=Varsha.Yadav@honeywell.com&key=8418182d662540cc8be3193224f8b7ff](https://managementportal.experion.honeywell.com/PasswordReset/Password_reset/?email=Varsha.Yadav@honeywell.com&key=8418182d662540cc8be3193224f8b7ff)  
This link will expire in the next 15 minutes.  
Thank you,  
Honeywell

4. In the **Create a new password** window, type the New password and Confirm password, and click **Next**.

The screenshot shows the 'Create a new password' form. At the top, it says 'Create a new password'. Below this is a red error message: 'Password should be alphanumeric. Must include 1 uppercase, 1 lowercase and 1 special character.' Underneath, it states 'Your password must have at least:' followed by three radio button options: '14 Characters' (which is selected), '1 Letter', and '1 Number'. There are two text input fields: 'New password:' and 'Confirm password:'. The 'Confirm password:' field has a 'Match' indicator and an eye icon. At the bottom are two blue buttons: 'Next' and 'Cancel'.

5. Now user is set to login to Connected OEM dashboard with username and password.

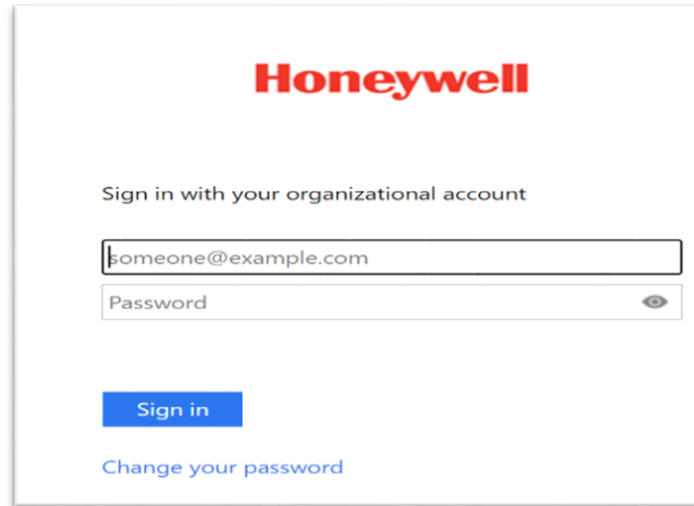

**Note:** The credentials for Connected OEM dashboard and Connected OEM mobile node are different. User receives two separate emails.

**Note:** As a Connected OEM user, you can access the Connected OEM dashboards from a desktop or a mobile device.

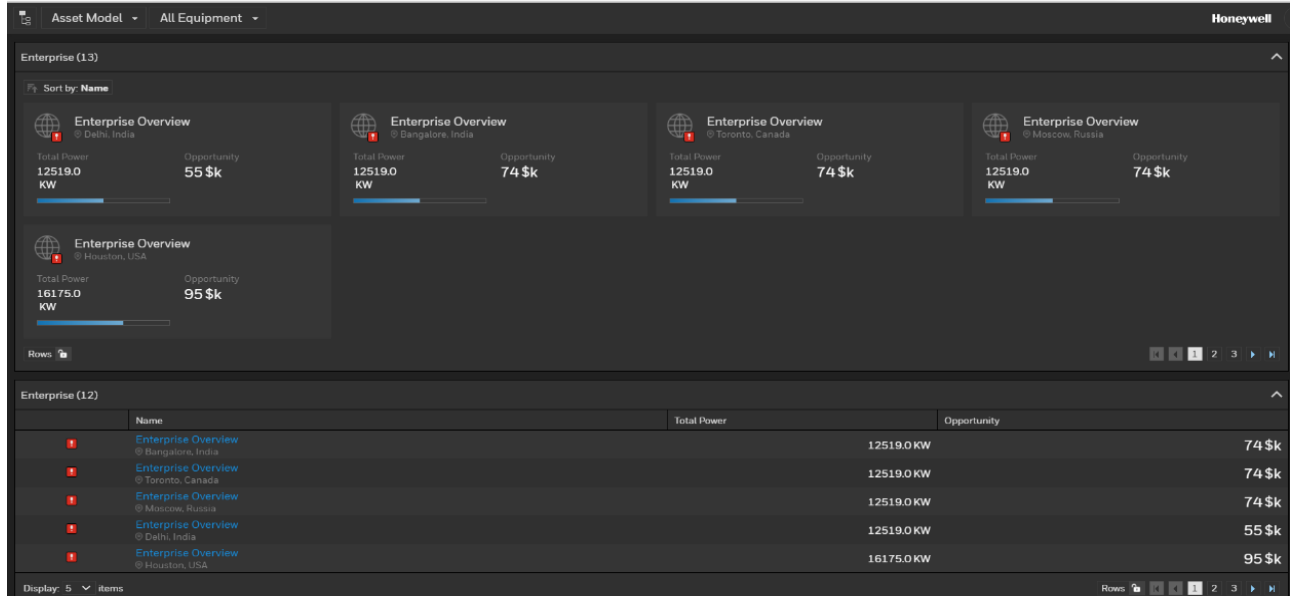

## Web Browser Login

**Note:** Contact OEM admin for OEM web dashboards server connection link.

1. Copy paste the server connection link in the browser.
2. Sign in with created User ID and Password.

3. After successful login, the dashboard view appears.

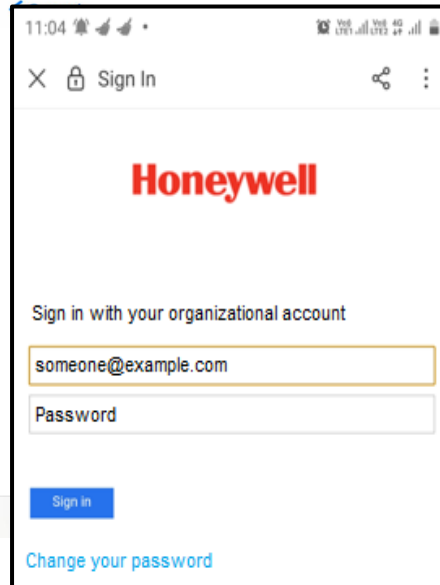

4. You now have the access to dashboards from your web browser.

## Mobile Device Login

**Note:** Contact OEM Admin for Connected OEM mobile node server connection link.

1. Ensure the Honeywell Experion Mobile app is download:
  - a. Download the app from the respective stores by using the provided QR code or URL link.
  - b. Click on the **Install** button.

- c. Click **Open** to login to the Connected OEM mobile node.

3. In sign in window, enter username and password. Click **Sign In**.
4. User can use **Change your password** option to change the password.

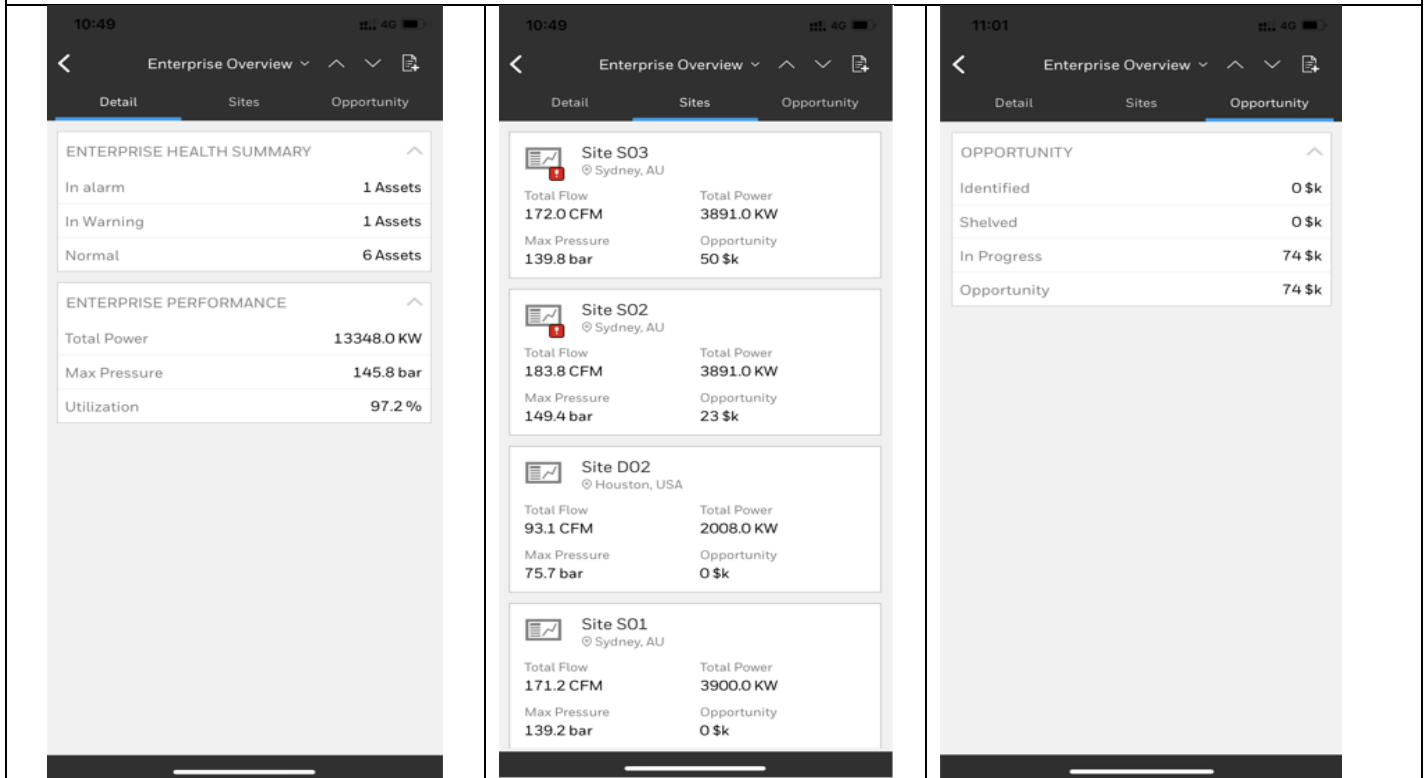

## Connected OEM Dashboard

A dashboard is a collection of data displayed in a graphical layout. It is utilized by the business heads, engineers, supervisors, planners and operators, for business analysis, monitor and to make decisions accordingly.

## Connected OEM Mobile Node

The mobile node displays the enterprise overview in three panes: **Detail**, **Sites**, and **Opportunity**. It shows similar information like a web browser.
