Fast output module with electrical isolation from the CPU for use with 4 channels each with 0…20 mA voltage and 10 bit resolution.

Use of a fast on-board micro controller allows decoupling and relief of the CPU regarding intensive computing tasks, such as scaling and filtering of signal data.

* Voltage range

Example:

- RL = 500 Ω
- RL = 0 Ω
- Ue = 20…30 V
- Ue = 10…20 V

### Indicators and connections

- **Description label**
- **Module-base-adresse**
- **Terminals**

**PCD3.W615**

Analog output module, 4 channels, 10 bit, 0…20 mA, galvanic isolation to the CPU
Galvanic separation of outputs to CPU, channels themselves not separated.

I/O modules and I/O terminal blocks may only be plugged in and removed when the CPU and the external +24V are disconnected from the power supply.

</tbody>
</table>
**Connection concept (example)**

The input signals are connected directly to the 14-pin terminal block. In order to couple as little interference as possible to the module via the lines, the connection should be made according to the principle explained below.

**Connection for 0…20 mA**

![Connection Diagram](image)

**Notes on the output range**

Balancing the offset and the amplification is done for the PCD3.W615 digitally by the μC. As there is no potentiometer, the output range has been slightly enlarged to cover maximum values even in the worst case.

Typical output range (without component tolerances):

0 mA ... +21.4 mA (instead 0 ...+ 20 mA)

This range is broken down on a 10 bit scale (1024 steps), as before.

The result is the following LSB resolution: 1 LSB = 21.7 μA

ATTENTION
These devices must only be installed by a professional electrician, otherwise there is the risk of fire or the risk of an electric shock.

WARNING
Product is not intended to be used in safety critical applications, using it in safety critical applications is unsafe.

WARNING - SAFETY
The unit is not suitable for the explosion-proof areas and the areas of use excluded in EN61010 Part 1.

WARNING - SAFETY
Check compliance with nominal voltage before commissioning the device (see type label). Check that connection cables are free from damage and that, when wiring up the device, they are not connected to voltage. Do not use a damaged device!

NOTE
In order to avoid moisture in the device due to condensate build-up, acclimatise the device at room temperature for about half an hour before connecting.

CLEANING
The device can be cleaned in dead state with a dry cloth or cloth soaked in soap solution. Do not use caustic or solvent-containing substances for cleaning.

MAINTENANCE
These devices are maintenance-free.
If damaged during, no repairs should be undertaken by the user.

GUARANTEE
Opening the module invalidates the guarantee.

Observe this instructions (data sheet) and keep them in a safe place.
Pass on the instructions (data sheet) to any future user.

WEEE Directive 2012/19/EC Waste Electrical and Electronic Equipment directive
The product should not be disposed of with other household waste. Check for the nearest authorized collection centers or authorized recyclers. The correct disposal of end-of-life equipment will help prevent potential negative consequences for the environment and human health.

EAC
EAC Mark of Conformity for Machinery Exports to Russia, Kazakhstan or Belarus.

**WARRANTY / REMEDY**

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship. Contact your local sales office for warranty information. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace without charge those items it finds defective. The foregoing is Buyer’s sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this printing. However, we assume no responsibility for its use. While we provide application assistance personally, through our literature and the Honeywell web site, it is up to the customer to determine the suitability of the product in the application.

*Specifications are subject to change without notice.*
