

HF RAILCAR CAPPING KIT TRAINING

As part of Solstice's commitment to safe and reliable transportation of hydrofluoric (HF) acid, we work extensively with our customers and local emergency responders to assist with emergency response training. This includes instructor-led HF Railcar Capping Kit training.

Practice HF Railcar Capping Skills Using Solstice's AHF Training Prop

Solstice offers excellent training utilizing an AHF Railcar prop that has been outfitted to replicate an AHF railcar protective housing. This training is:

- **Convenient:** The railcar training prop is on a skid that can be shipped to your facility to give site and local emergency responders hands-on experience and practice as your training schedule allows.
- **Practical:** After HF Railcar Capping Kit instruction is complete, Solstice will leave the portable railcar training skid so employees can practice on it for up to two weeks. This allows them to become even more familiar with Capping Kit design and installation.
