

ELIMINATING GREENHOUSE GAS EMISSIONS ONE BREATH AT A TIME

Solstice® Air (HFO-1234ze(E), cGMP) can reduce greenhouse gas emissions of propellant by up to 99.9% vs. current inhaler propellant.

Could avoid the release of more than **16.7 million metric tons** of carbon dioxide equivalent emissions into the atmosphere per year.

EQUAL TO:

CO₂ emissions from **2.0M homes'** annual energy use**

Yearly greenhouse emissions from **3.6M cars****

CO₂ emissions from **18.4B pounds** of coal burned per year**

CO₂ sequestered by **19.7M acres of forests** annually**
