Honeywell Cohesa[®] 3060 Emulsion Ethylene Acrylic Acid Copolymer Emulsion

Cohesa 3060 Emulsion is a novel surfactant-free oil-in-water emulsion of an ethylene acrylic acid copolymer that may be used as an additive in many waterbased systems to enhance their technical performance. Typical applications include the modification of inks, coatings, adhesives and pressure sensitive adhesives.

SHELF-LIFE AND STORAGE

Cohesa 3060 Emulsion must be protected from direct sunlight and freezing conditions during transport and storage. Specifically it is recommended that it is maintained at temperatures between 5°C and 35°C.

When stored in its original unopened containers the product has a shelf-life of 12 months.

SAFETY

Prior to use consult the product's safety data sheet for specific recommendations on safe handling. When handled in a manner consistent with these guidelines, whilst respecting any additional local requirements, Cohesa 3060 Emulsion is considered to be a non-hazardous product.

TYPICAL PROPERTIES

Property	Value
Active Solids (%)	45
Brookfi Viscosity @25°C (cp)	850
pH	8

PRODUCT FORM AND SIZE

Property	Value
Product Form	White oil-in-water emulsion
Mean Particle Size (Microns)	0.2
Packaging Units	25kg, 200kg & 1000kg
