

NEW

COMBISAFE LOADING SYSTEM STAIR BRACKET

UNIQUE FEATURES:

- Simple to install
- Only one bolt needed to complete installation

BENEFITS:

- Easy access to the truck or trailer bed
- Can be mounted on any face of the MkII Loading System
- Encourages safe work practices
- Available for hire and sale

The new Combisafe Loading System (CLS) Stair Bracket enables safe, easy access to the truck or trailer bed when using the Combisafe Loading System.

This cleverly designed bracket, is very easy to install and enhances the safety benefits of the loading system for all operatives.

COMBISAFE[®]
SAFETY BY SYSTEMS

The bracket is simply slotted into the cruciform top frame and secured with a single bolt which is supplied with the unit; it can be mounted on any of the 4 faces of the Combisafe Loading System MkII. Having fitted the bracket, a standard Combisafe Site Stairway with 6 steps and scaffold attachments, complete with two guardrails, is simply hooked on to the top tube of the bracket, adjusted for height and then locked. Once the locking screws are tightened, the stair is firmly and rigidly attached.

COMBISAFE LOADING SYSTEM (CLS) STAIR BRACKET

The Stair Bracket is a simple-to-fit component which enables a standard Combisafe Site Stairway to be fixed to the Loading System base unit, providing safe access to the bed of the truck or trailer.

Made from hot dip galvanised steel with a replaceable non-slip aluminium top step, the Stair Bracket can be fitted to any face of the base unit as a vital part of a safe system of work for truck loading and unloading.

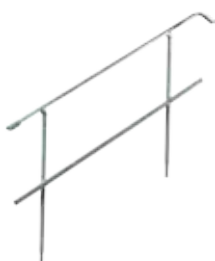

Art No. UK15090P01 - Weight 18 kg

SITE STAIRWAY – 6 STEP

The galvanised Site Stairway is a simple and effective access solution. Foldable, the stairway complies to EN 12811 and automatically adjust to the correct height to fit to the bracket while keeping the treads horizontal.

Art No. CT1003Z - Folded length 1.84m. Weight 31kg

SITE STAIRWAY HANDRAIL – 6 STEP

For use with the Site Stairway 6 Step.

Art No. CT1008Z - Weight 8kg

SCAFFOLD ATTACHMENT

The Scaffolding Attachment is designed to hook over standard scaffold tube, and to integrate with most system scaffolds.

Here it is used to attach the Site Stairway to the CLS Bracket.

Art No. CT1021 - Weight 0.6kg

*For a complete system
you will require the following:*

Art no.	Description	Quantity per Loading System base unit
UK15090P01	CLS Stair Bracket	1
CT1003Z	Site Stairway 6 step	1
CT1008Z	6 step Guardrail	2
CT1021	Scaffold Attachment	2
