

# 2000 Series Half Mask

## Product description

Lightweight silicone construction and an impressive variety of features make the 2000 series half masks one of the industry's most comfortable, user friendly half mask air purifying respirators.

It has a large, pliable sealing area, providing excellent wearer fit. Oversized inhalation ports provide lower breathing resistance, enhancing wearer comfort. An angled, self adjusting nose bridge fits a variety of nose shapes and sizes comfortably and accommodates safety or prescription eyewear.

An improved yoke design gives a snug, secure fit, and reduced face-piece slippage, yet permits easy donning and doffing. A computer-designed face-piece allows optimal speech communication without the aid of a speaking diaphragm.

The 2000 series is the ideal air purifying respirator for people that use masks on a regular basis.

## FEATURES

- Oversized inhalation ports provide lower breathing resistance.
- Comfortable, angled self-adjusting nose allows for safety eyewear.
- Yoke design for a snug secure fit and reduced face-piece slippage.
- Optimal speech communication without a speaking diaphragm.
- Replacement parts available for significant cost savings.

## APPLICATIONS

- Suits numerous applications. Filters are available to protect against various contaminants

## Technical Details

Materials: Silicone  
 Filters: Compatible with legacy Sperian threaded cartridges

## Standards

Certified to AS/NZS 1716:2012 Licence No:0952
