

# Honeywell

## PROTECTION WITH COMFORT

## FFP2 Mask

Honeywell FF2400 series respirators have been designed and rigorously tested for safety and comfort. It protects users against dust, pm2.5, microorganisms, other pollutants and is comfortable for all day use.

### FLAT FOLD STYLE:

Flat-fold styles is convenient and can be used for storage in a pocket. A fold -and-hold mechanism prevents contamination between uses and offers easy storage. The integrated chin piece design improves fit and allows better speaking movement.

### ERGONOMICALLY DESIGNED

Ergonomic design provides a non-oppressive feeling on the face, and ease of movement for speech. The respirator can be easily molded to suit each individual's facial contours while ensuring a maximum respirator service life

### TESTED FOR EFFICIENCY

Tested for particulate removal efficiency at Defense Research and Development Organization. Tested for medical use by South Indian Textile Association Lab.

### FACE SEAL

The Sealing provides maximum protection and comfort by resting softly against the wearers skin to improve the air seal around the face and/or nose while absorbing

### SPECIFICATIONS

- Flat fold without valve
- FFP2 conformance
- Lightweight for comfortable, long duration wear.
- Foam inner lining for better moisture absorption and stiffness.
- Total weight :10 gms
- Soft nose clip.
- Ultrasonically-welded, latex-free knitted headbands.
- Maximum comfort in hot and humid conditions.
