

EMERGENCY EYEWASH

Eyewash Expiration Timer™

Compliance made easy

Item # 32-000466-0000

The Eyewash Expiration Timer provides simple, effective visual management for emergency eyewash, helping to ensure OSHA compliance in the workplace. Featuring a highly-visible LCD screen and color-coded LED maintenance indicators to alert safety managers and supervisory personnel when the usable life of eyewash solution nears expiration – saving time on manual inspections, decreasing reliance on expiration stickers, and reducing the risk of human error in maintaining the availability of emergency eyewash.

Displays the remaining weeks of solution life in a real-time, countdown format. Manages up to two eyewash products at a time.

MOUNTING OPTIONS & COMPATIBILITY

Each timer includes a set of adhesive hook and loop fastener strips for convenient installation options on or near eyewash stations, bottles or nearby walls. The Eyewash Expiration Timer can also be mounted using a convenient key-hole screw (hardware not included). Be sure to install the device in a highly visible location. In

some instances, this may be on the desk of a safety manager or on a shelf or wall in a storage garage or supply room.

Compatible with all Honeywell Emergency Eyewash products, including primary and secondary devices, wall mounted stations, and individual bottles. Can also be used with most brands of eyewash products.

FEATURES & BENEFITS

- Easy to program, intuitive, user-friendly design
- Durable ABS plastic construction
- Calculates expiration date of solution in real time
- Highly visible 2.5" LCD screen can be seen easily from up to 12 feet away
- Color-coded LED alerts indicate remaining weeks of solution usability
- Manages data for up to two eyewash products for facilities where multiple bottles, stations or dual cartridges are used
- Helps maintain OSHA compliance by following manufacturer's recommendations for maintenance and replacement
- Includes (2) AAA batteries

Yellow alert flashes when solution reaches six weeks or less from expiration.

Red alert flashes when solution reaches two weeks or less from expiration.
