

Technical Specifications

Söll MultiRail® mobile anchor points Openable runner

Description:

The openable runner is a mobile anchor point for both system types Söll MultiRail® and Söll MultiRail Aluminium®. Available in stainless steel with polyamide inlays to minimize friction and provide great gliding performance, it is fitted with a stainless steel connector. As wheels are not necessary, it is dirt-resistant as well as very light, only 600g. By means of an easy to use opening and closing mechanism, it can be removed or attached anywhere along the rail offering more flexibility to the user during his work. Proposed for companies with high frequency of use on several Söll MultiRail systems or where the systems do not have defined entry and exit points.

Reference:

- 17792 / 1013518

Material:

- Stainless steel 316 (A4)

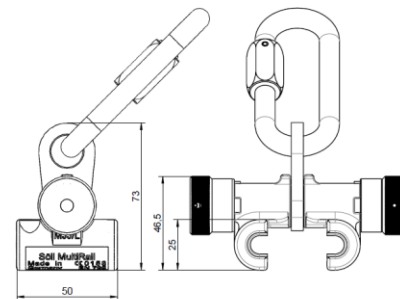

Technical characteristics:

- Weight: 600 g
- Breaking strength: > 25kN
- Operating temperature: -50 to +90°C

Certifications:

- Söll MultiRail® components are tested according to EN 795:2012 type D and the additional tests CEN/TS 16415:2013

Quality control:

- Manufacturing acc. to EN ISO 9001
- Quality check for each part
