

HONEYWELL NORTH SHORT BRIM HARD HAT

Why Not Choose Both Quality and Price?

Enhanced performance, all-day comfort, durability – Honeywell North Short Brim Hard Hat combines the heritages of the two world-recognized brands into a new cost-effective, certified head protection solution, with vented and non-vented versions. Stop wondering whether to choose price over quality. Have them both.

SET A NEW STANDARD FOR COMFORTABLE PROTECTION

In workplace environments such as industrial or construction sites, high rotations of personnel are common practice and providing dozens of workers with certified head protection can be expensive. Choosing a less known manufacturer, you might get a product with compromised quality, not certified to the latest standards. That would put your workers' safety at risk and bring about possible customer service issues.

Honeywell has designed the North Short Brim Hard Hat to offer your workers certified quality protection, also respecting your budget. Created by Honeywell, a recognized company known for its support, high performance and service, the North Short Brim Hard Hat provides quality protection, increased comfort and a competitive price.

QUALITY PROTECTION

Made of high-density polyethylene (HDPE), Honeywell North Short Brim Hard Hat is the quality safety solution for all-day wear, protecting against impact and falling or flying objects. If the hard hat isn't well-balanced or moves and slips out of place, it can increase risks and reduce worker productivity. Therefore, Honeywell has designed this hard hat with a four-point ratchet suspension, a dual-locking mechanism and an optional four-point chin strap to customize your fit according to your preferences and prevent the hard hat from getting loose. No matter if you work in extreme heat or cold environments, you'll benefit from the same reliable protection – Honeywell North Hard Hat is resistant to temperatures from -22°F to 122°F (-30°C to +50°C).

INCREASED COMFORT

Benefit from increased comfort with Honeywell North Short Brim Hard Hat's light material – it is created to weigh up to 14.46 oz. (410 g), hence eliminating neck fatigue and increasing work productivity. Moreover, with an ergonomic design and several adjustment features, it provides an excellent fit for multiple head sizes. Increase your comfort and choose the cooling efficiency you desire with the vented hard hat or benefit from protection against electrical hazards with the non-vented version.

COMPETITIVE PRICE

When creating the Honeywell North Short Brim Hard Hat, the two brands have combined their extensive market

and engineering knowledge and expertise, as well as many years of experience as leading manufacturers of personal protective equipment (PPE). Honeywell North Short Brim Hard Hat is the new generation of fully certified hard hats providing excellent protection, quality, comfort and a long lifespan, everything for an affordable price. Compatible with Honeywell headgear accessories – face shields, welding and hearing protection – and certified to ANSI, CE/EN, CSA and NOM standards, Honeywell North Short Brim Hard Hat delivers the quality protection you need for the price you expect.
