Overview

Key Features

- Integrated sideshield and frame design providing great coverage and a close fit to the eye . That makes the SW12 providing superior protection under multipurpose usage including high particle environments (dirt, dust, airborne debris)
- Smooth foam sub-frame providing extra comfort for a full day of protection at work. The foam can be removed and replaced to extend life of the spectacle
- Aeration holes on the foam to reduce fog generation
- Soft touch temple to minimize tension around the ears and improve comfort
- Dielectric spectacle: contains no metal parts. Spectacle can be worn in environments where electrical hazards may exist for greater versatility
- Modern and sporty design to increase worker acceptance & wearing time
