

Product Family
Honeywell Howard Leight™
VeriPRO® 4.0

Test real earplugs. Get real results. VeriPRO 4.0 is a software update to Honeywell's popular fit-testing system for hearing protectors, widely accepted in proactive Hearing Conservation Programs for its ability to test the real-world protection levels of any earplug from any manufacturer. VeriPRO 4.0 is engineered to be compatible with updated Microsoft architecture and provide easier installation and performance for today's computers.

 VP HEADPHONES	Audiometrically Optimized Headphones Box packaging
 VP-AMP	Audio Processor Box packaging
 VP-CABLE	USB Computer Cable Polybag packaging
 VP-CUSHIONS	Replacement Ear Cushions Polybag(Pair)packaging

Overview

Key Features

VeriPRO Earplug Fit Testing

VeriPRO makes it easy to get an accurate, real-world picture of your employees' hearing protection. Find out whether your employees are receiving optimal protection, require additional training on how to fit their earplugs, or need to try a different model. VeriPRO uses sophisticated software in a user-friendly format to find out the Personal Attenuation Rating [PAR] your employees are receiving from their earplugs.

- Measures real world attenuation by using unmodified earplugs• Simple software installation and hardware set-up
- Fast, accurate, easy-to-understand results displayed within minutes
- Captures and stores historical information on employee PAR
- Fulfills regulatory requirements to “ensure proper initial fitting” of hearing protectors
- Works with any earplug

Recommended Industries/Use

- Other
- Agriculture
- Chemical
- Construction
- Food Services
- Forestry
- Government
- Law Enforcement
- Manufacturing
- Medical
- Military
- Mining
- Municipal Services
- Oil and Gas
- Pharmaceutical
- Steel and Metals
- Transportation
- Utilities
- Welding
- Nuclear
- Wind Energy

Hazards

- Noise
