

A personal approach to Hearing Conservation

VeriPRO™ is the quick and easy way to make sure your employees are getting the most out of their hearing protection. It's one more way that Howard Leight helps create Hearing Conservation Programs without compromise.

On-site verification has never been easier

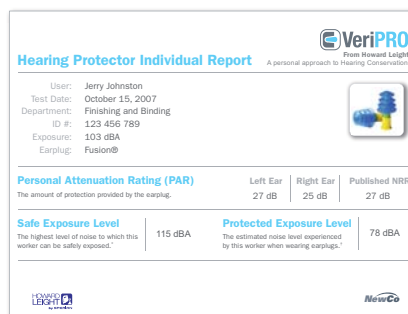

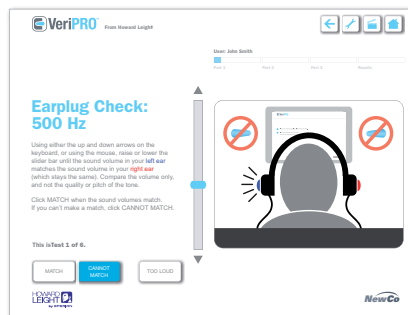

VeriPRO makes it easy to get an accurate, real-world picture of your employees' hearing protection. Find out whether your employees are receiving optimal protection, require additional training on how to fit their earplugs, or need to try a different model. VeriPRO uses sophisticated software in a user-friendly format to find out the Personal Attenuation Rating [PAR] your employees are receiving from their earplugs.

Developed in conjunction with the House Ear Institute [www.hei.org], VeriPRO's three-part process checks the effectiveness of an employee's earplug fit in each ear over a range of frequencies. This information is then captured in individual and group reports, accessible by the safety manager.

By verifying earplug effectiveness and providing an ideal opportunity for education, VeriPRO becomes an integral part of a successful Hearing Conservation Program.

VeriPRO is a simple and effective way to implement better Hearing Conservation practices in any workplace

- Measures real world attenuation by using unmodified earplugs
- Simple software installation and hardware set-up
- Fast, accurate, easy-to-understand results displayed within minutes
- Captures and stores historical information on employee PAR
- Fulfills European Directive 2003/10/EC requirements for training
- Works with any earplug

How It Works

VeriPRO walks the employee through a series of simple sound checks that measure real world attenuation.

COMPLETE CHECK – A complete test of earplug fit at five frequencies to determine Personal Attenuation Rating – the actual real-ear attenuation of the earplug.

QUICK CHECK – A simplified test of earplug fit at one frequency, used as a fast and easy pass/fail check of earplug effectiveness.

ORDERING INFORMATION

Ref	DESCRIPTION	PACKAGING
VERIPRO	VeriPRO System – Single Software License Includes Audiometrically Optimized Headset, Audio Processor, CD with Software, Replacement Ear Cushions, Earplug Samples, Quick Reference Guide, Technical Support	Carrying Case
