

## Product Family ANSI Z308.1-2015 Kit Assortment

Honeywell now offers a full assortment of First Aid Kits compliant with the latest ANSI revision, including bulk, unitized, stations and refills.

The latest revision maintains the four types of kits and introduces a separation into two classes. Kits in class A include a basic range of products to deal with the most common types of injuries. Class B kits include a broader range and quantity of supplies to deal with injuries encountered in more populated, complex and/or high-risk workplaces. Each class has a minimum required fill with increased quantities and/or variety. Refer to ANSI/ISEA Z308.1-2015 standard for full details. ANSI does not enforce laws or write regulations. The standard is intended as a guide to aid the manufacturer, consumer and general public.
