

## Technical Note

### Vertex Series Cabinet Filter Usage

1998-1047 Rev 1 11/23

The Vertex Series cabinets are designed to have a filter installed in front of the pump fans/door to reduce the amount of dust and debris entering the cabinet and potentially reduce the cooling circulation inside the cabinet.

While Honeywell recommends using the filter in environments where dust is present, the use of this filter is at the user's discretion. \*Should the decision be made to remove the cabinet filter, additional cleaning of the cabinet and pump fans may increase in order to maintain the cabinet cooling properly.

*\*Removal of the Cabinet Filter will not void the product warranty against material defects and workmanship as described in the product manual.*
