One style. Three sizes. Customized fit & performance.

**Honeywell**

# PROTECTIVE EYEWEAR SYSTEM

Setting out with a unique approach to safety eyewear, Honeywell wanted to create a product that would fit everyone - no matter their gender, ethnicity, or facial features. Founded on enduser research, the company poured everything it learned into the development of the North Adaptec eyewear. The result? An adjustable eyewear system that can be worn by the widest range of workers and still deliver excellent protection, superior comfort, customized adjustability, premium optics, and a stylish look.

## ONE STYLE.

Means simplicity of stocking and ordering as well as consistent usage by workers.

## THREE SIZES.

Means the right protection, improved performance and optical clarity for everyone in your workplace.

## CUSTOMIZED FIT

Means personalized comfort for each wearer, ensuring all-day protection and compliance with safety requirements.

Research shows that different facial features demand customized adjustability. North Adaptec™ offers personalized eye protection in all the right places, and adjusts in seconds for customized all-day comfort.

# ADJUSTABLE EQUALS COMFORT

## ADJUSTABLE NOSE BRIDGE CENTERS EYES TO REDUCE FATIGUE

Three position nose bridge is simple to adjust and keeps eyes centered in the lens, where optical clarity is best. Workers' vision is less strained so they experience less eye fatigue, work more comfortably for longer periods, and can more clearly see their work.

## SELF-ADJUSTING NOSE PADS ADD TO WORKER COMFORT

Soft, flexible material allows each nose pad to independently conform to the wearer's face, delivering greater comfort, contact, and stability.

## ADJUSTABLE LENS ANGLE IMPROVES SAFETY AND REDUCES FOGGING

Each temple hinge ratchets to seven positions - the 30° of custom adjustability - so lens is angled for both optimal eye protection and ideal space for air circulation

## TEMPLES MICRO-ADJUST FOR A SNUG FIT AND ALL-DAY COMFORT

A proprietary temple design (patent pending) allows workers to adjust temple tension anytime, safely and without removing eyewear. Workers can adjust for personal preference or task at hand - a firmer fit for active work or a lighter fit for general wear.

**Be more comfortable**

Soft, flexible material covers frame components for comfortable, secure fit.

**Be more protected**

Ratcheting temple hinges adjust lens angle for greater protection and reduced fogging

**Be more secure**

Proprietary temple design (patent pending) adjusts temple tension for personal comfort and non-slip security. Temple inserts slide from front to back for firmer fit - or in opposite direction for looser fit.

**Ready for any condition**

The North Adaptec HydroShield Anti-Fog coating ensures fog free times 90X longer than majority of other products and has 2X the scratch resistance. Plus >99.9% UVA/UVB protection. It is available in Clear, Smoke and IR 5.0 shade lens tint. Meets ANSI Z87.1.

**See clearly with less fogging**

Vented, cushioned frame allows optimum air circulation and reduces fogging

**Stay alert with less eye fatigue**

Adjustable nose bridge keeps eyes centered in lens for clearer optics and reduced eye fatigue.

**Replace lens quick and easily**

Even the toughest lens can break or scratch. That's why the North Adaptec features a lens replacement system that is a snap.

## HONEYWELL NORTH ADAPTEC™ ORDERING INFORMATION

**Clear** - Used for most indoor work applications.

**Smoke** - Minimizes outdoor sunlight and glare.

**IR Shade 5.0** - For light blazing, cutting and gas welding
