

EYE PROTECTION FOR A VARIETY OF CLINICAL SITUATIONS

Our line of goggles and protective eyewear offers protection from fluid exposure, chemical splash and impact, as well as high-end styling and comfort for healthcare professionals. Many goggles feature convenient touches such as lens replacement systems and anti-fog lens treatments.

EYE PROTECTION

UVEX STEALTH® GOGGLES

High end styling and comfort offers unmatched protection from splash and impact. Uvex Stealth's toric lens design is coated with HYDROSHIELD® Anti-Fog, MMT-MULTI MATERIAL TECHNOLOGY® elastomer body, and a simple, economical lens replacement system. Rx insert available.

UVEX CARBON VISION GOGGLES

Low profile goggle is ideal for wearing with disposable respirators, underneath face shields, with no interference with protective caps. Carbonvision also features DuraStreme dual anti-fog/anti-scratch lens coating technology.

UVEX CLASSIC – ECONOMICAL GOGGLES

Uvex® Classic Series economy goggle is available with closed venting or with indirect venting for impact and splash protection. Goggle fits over most prescription eyewear. All Uvex Classic models feature Uvextreme® Anti-Fog coating.

SEALED EYEWEAR

UVEX LIVEWIRE

UVEX Livewire sealed eyewear is engineered to offer low-profile eye protection with our HydroShield® Anti-Fog coating and the option for a simple temple-to-headband exchange system. Rx frame available.

UVEX SEISMIC

UVEX Livewire sealed eyewear is engineered to offer low-profile eye protection with our HydroShield® Anti-Fog coating and the option for a simple temple-to-headband exchange system. Also available in readers.

EYE PROTECTION

Note:

- The CDC mentions that protective eyewear (e.g., safety glasses, trauma glasses) with gaps between glasses and the face likely do not protect eyes from all splashes and sprays. (1)
- These products should have extensions to cover the side of the eyes,
- Appropriately fitted, indirectly-vented goggles* with a manufacturer's anti-fog coating provide the most reliable practical eye protection from splashes, sprays, and respiratory droplets. (2)

**Directly-vented goggles may allow penetration by splashes or sprays; therefore, indirectly-vented or non-vented goggles are preferred for infection control.*

UVEX AVATAR®

UVEX Avatar is a premium and stylish protective eyewear option for healthcare professionals. HYDROSHIELD® Anti-Fog coating, adjustable temples, and OTG or Rx frame options.

UVEX A700 SERIES

Uvex A700 Series provides lightweight, distortion-free protection and comfort at a great value. Uvex A700 Series has a 9-base wraparound frame and soft temple pads that offer a secure fit.

UVEX SVP SERIES

Uvex SVP 200 offers stylish, low-profile and very lightweight fit for all day comfort. It has flexible temple tips, 10-base, dielectric, wraparound frame and is available in fog-resistant and hardcoat anti-scratch coatings.

ULTRA-SPEC

Ultra-spec 1000 is an uncoated 100% polycarbonate wraparound uni-lens design with side shields. Also referred to as "visitor spec."

EYE PROTECTION LENS MAINTENANCE SOLUTIONS

Safe for use on all surfaces, including polycarbonate and glass

LENS CLEANING STATION

Permanent Station is compact in size so it takes up less room and mounts just about anywhere you need with screws or adhesive pads. The cleaning solution wipes away most debris and it dissolves skin oils that often build up in the top, inside area of the lenses.

S484

LENS CLEANING WIPES

Clear dirt and smudges off glasses and screens with these Honeywell S474 Uvex Clear® lens cleaning tissues. The nonabrasive, silicone-free fabric glides smoothly across surfaces for quick, easy cleaning. The large 5 x 8-inch sheets simplify handling, and they're single-use for convenient disposal.

S474

FOG ELIMINATOR

Uvex Fog Eliminator Plus products. Formulated to effectively protect lenses from all types of fogging caused by cold, high humidity or sudden temperature changes. Available in 10 ml gel bottle good up to 300 applications or pre-conditioned box of 100 AF wipes.
