

# Honeywell North<sup>®</sup> Primair<sup>®</sup> PA700 PAPR Decon Kit

Easy to clean, easy to use, easy to maintain

The Honeywell North<sup>®</sup> Primair<sup>®</sup> 700 (PA700) Series PAPR is engineered to be ergonomic, efficient, and effortless to get workers on the job faster and keep them comfortable and productive. The PA700 Series PAPR offers convenience, comfort, and confidence – all day, every day.

Now available in a decon kit, the decon belt has expanded the use of the PA700 into environments that must have fast and thorough clean-ability.

The new decon belt is part of the Honeywell North PA700 System and has the same ergonomic design as the standard PA700 industrial belt. It features a **smooth, easy-to-clean polyurethane coated nylon** which removes debris quickly and thoroughly in a decon shower, or when submerged.

The belt structure is designed to evenly distribute the PAPR's weight, avoiding stress or strain on the user's back and legs.

## Industries and Applications:

- Pharmaceutical Development
- Manufacturing (silica dust)
- Abatement
- Construction

## FEATURES & BENEFITS

- **Ergonomic design evenly distributes unit weight**
  - Minimizes stress on joints and muscles
  - Reduces muscle fatigue
  - Keeps workers productive
- **Adjustment straps are made of polyurethane coated nylon**
  - Easy to clean / maintain
  - Ability to submerge in water or decon shower
- **Dual side adjustment**
  - Customized fit for every worker – maximize comfort
  - Set once for easy donning / doffing – saves time to get workers back on the job faster
  - Accommodates up to 60 inch waists
- **Lock/key attachment with PAPR**
  - PAPR locks on to belt, securing the unit to prevent accidental disconnections
  - Instills user confidence
