

# EYE PROTECTION FOR VACCINE HANDLING

## HONEYWELL UVEX STEALTH®

### PRODUCT USE

As workers manipulate the vaccine shipments, their face remains exposed to flying dust, debris and chemical splash accidents. The safety glasses (sealed) or goggles are especially designed to protect against these hazards. Featuring premium Uvex HydroShield® Anti-fog coating, they can be confident fogging that can occur while entering and exiting the cold, will not occur.

### BENEFITS

Honeywell Uvex Stealth® is the most popular goggle on the market. Its high-end styling and comfort offers unmatched protection from chemical splash and impact. Uvex Stealth's toric lens design is coated with HydroShield® Anti-Fog, MMT-Multi Material Technology® elastomer body, and easy and economical lens replacement system.

- Low profile design and indirect venting system for chemical splash, airborne debris and impact protection
- D3 certified, provides protection from droplets and splashes
- HydroShield® Anti-Fog coating is permanently bonded to the lens, featuring dual action
- properties that keep lenses clear up to 90X longer and 2X more scratch resistant than most other anti-fog products in the market
- Anti-Scratch coating minimize fogging
- The Toric lens offer superior optics and unobstructed peripheral vision
- Soft, elastomer body flexes and conforms to the face for a secure, comfortable, gap free fit
- The pivoting and headband provide quick and easy adjustment for a comfortable fit
- Meets ANSI Z87+ - 2015 for High Impact and is CSA certified

## HONEYWELL DISPOSABLE FACE SHIELD

### PRODUCT USE

The Honeywell Disposable Face Shield offers an extra layer of protection when social distancing isn't possible. With anti-fog coating to avoid visibility issues, it will ensure full face protection.

### BENEFITS

The Honeywell Disposable Face Shield is designed for healthcare and social care workers and is intended for use in situations where social distancing isn't feasible and in areas with high risk of community disease spread. The disposable face shield complies with Government regulations for splash and droplets, and offers enhanced protection against the transmission of droplets in the air. Unlike DIY solutions, this face shield provides an anti-fog coating to reduce moisture build-up and avoid low visibility and hazing.

- 15" wide and 9.1" height to provide large coverage over the face
- PET recyclable material with 0.188 mm thickness
- Anti-fog coating on interior surface to prevent fogging and provide better vision
- 1.2" foam thickness for optimal distance between face and face shield
- FDA registered
- Complies with:
  - ANSI/ISEA Z87.1-2015 Clause 8.1.2 droplet & splash hazard-face shields
  - EN 166:2001 Clause 7.2.4 protection against droplets & splashes of liquids
- Elastic band (0.6" wide) for extra comfort and universal fit
- Optical grade
- White background for easy writing names or functions
