

1 **TYPE EXAMINATION CERTIFICATE**

2 Component intended for use in Potentially Explosive Atmospheres Directive 94/9/EC

3 Certificate Number: **Sira 15ATEX4029U** Issue: **0**

4 Component: **Touchpoint Pro Analogue Input Module mV Bridge (AIMmV)**

5 Applicant: **Honeywell Analytics Ltd**

6 Address: **4 Stinsford Road
Nuffield Estate
Poole, Dorset
BH17 0RZ
United Kingdom**

7 This component and any acceptable variation thereto are specified in the schedule to this certificate and the documents therein referred to.

8 Sira Certification Service certifies that this component has been found to comply with the Essential Health and Safety Requirements that relate to the design of Category 2 3 components, which are intended for use in potentially explosive atmospheres. These Essential Health and Safety Requirements are given in Annex II to European Union Directive 94/9/EC of 23 March 1994.

The examination and test results are recorded in the confidential reports listed in Section 14.2.

9 Compliance with the Essential Health and Safety Requirements, with the exception of those listed in the schedule of this certificate, has been assessed by reference to:

EN 60079-0:2012

EN 60079-15:2010

The above list of documents may detail standards that do not appear on the UKAS Scope of Accreditation, but have been added through Sira's flexible scope of accreditation, which is available on request.

10 The sign 'U' is placed after the certificate number to indicate that the product assessed is a component and may be subject to further assessment when incorporated into equipment. Any special conditions for safe use are listed in the schedule to this certificate.

11 This TYPE EXAMINATION CERTIFICATE relates only to the design of the specified component, and not to specific components subsequently manufactured.

12 The marking of the component shall include the following:

II 3G

Ex nA IIC T4 Gc

Project Number 70004994

13 DESCRIPTION OF COMPONENT

The Touchpoint Pro Analogue Input module mV Bridge (AIMmV) is used to read signals from field devices such as gas detectors and communicates to the central control module of a TPPR System over a ring network. The AIMmV is used to power and measure the response from catalytic sensors. The module contains two boards, a Safety Core IO board and an Analogue Input board. The two boards connect together via a board-mounted plug and socket and are enclosed inside a plastic housing. The AIMmV is intended to be mounted on a DIN rail inside a cabinet which provides an ingress protection of at least IP54.

The AIMmV module has four channels and four sets of terminals (TB1 to TB4). Each set of field terminals provides a constant current output to external gas sensors. These terminals are mounted on the Analogue Input Board and appear at the front of the housing.

External power connections are made to the rear of the Analogue Input Board edge connector which plugs into a Backplane mounted on a DIN rail.

Rated voltage at the DIN-rail edge connector = 18V-32V dc.

14 DESCRIPTIVE DOCUMENTS

14.1 Drawings

Refer to Certificate Annexe.

14.2 Associated Sira Reports and Certificate History

Issue	Date	Report number	Comment
0	07 May 2015	R70004994B	The release of the prime certificate.

15 SPECIAL CONDITIONS FOR SAFE USE

15.1 The component shall be installed in an Ex e or Ex n approved enclosure that provides an ingress protection of at least IP54.

15.2 The component shall only be used in a service temperature range of -40°C to +70°C.

16 ESSENTIAL HEALTH AND SAFETY REQUIREMENTS (EHSRs)

The relevant EHSRs that are not addressed by the standards listed in this certificate have been identified and individually assessed in reports listed in Section 14.2.

17 CONDITIONS OF CERTIFICATION

17.1 The use of this certificate is subject to the Regulations Applicable to Holders of Sira Certificates.

17.2 Holders of type-examination certificates are required to comply with the production control requirements defined in Article 8 of directive 94/9/EC.
