

## Technical Note

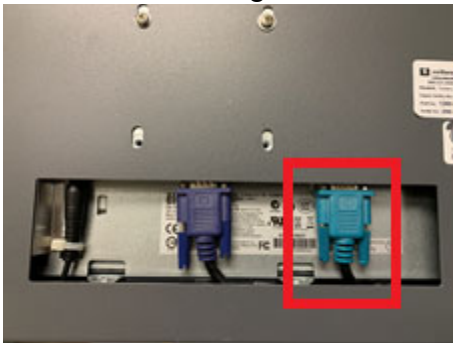

### Vertex Computers with single Serial Port

1998-1039 Rev 2 07/22

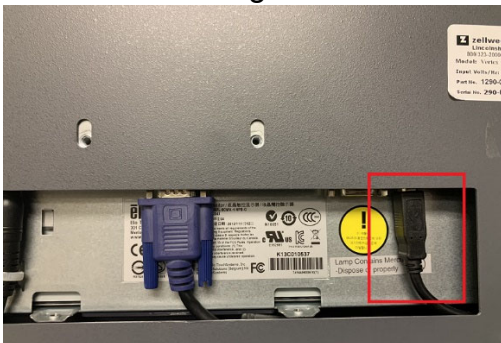

Older Vertex computers contained 2 Serial ports where-as the newer Vertex computers now only come with 1 Serial port. One of the Serial ports was used for the touchscreen interface which is now interfaced via a USB connection, as a result we have added a USB cable to the kit for connection of the touchscreen monitor to ensure a seamless installation.

Use the pictures below to identify if the touch screen monitor connects by serial cable or USB cable (located behind monitor access panel).

#### Connections using serial cable

#### Connections using USB cable

*Please note: If the touch screen monitor is connected by a serial cable but doesn't have a USB port, the monitor will need to be upgraded; The current touch monitor has a USB port."*

Monitor Mounting Kit (1295K0549) and Monitor (0185-0111)

For further installation instruction assistance, please contact your local Honeywell Analytics (HGAS) service provider.
