

NEW!

Miller TechLine™ Kits for Residential Construction

Kits to Accommodate One or Two Workers

Introducing New

Miller TechLine™ Temporary Horizontal Lifeline (THLL) System Kits

Specially designed for use during
residential roof construction

- **Quick and easy to install**, TechLine THLL system kits include all the components required for installing a fall protection roof system
- Kit configurations are available to accommodate **1 or 2 workers**
- **Low-stretch, durable horizontal lifeline system** provides 100% tie-off for continuous fall protection; provides a secure anchorage point(s) with less deflection/reduced fall clearance requirements
- **Integrated vertical lifeline/rope grab components** enhance worker mobility, productivity and safety
- System kits are **lightweight and portable**

Miller TechLine™ Kits for Residential Construction

Feature & Benefits:

- Kit configurations are available for 1 or 2 workers
- Quick and easy to install for increased productivity
- Provides 100% tie-off for continuous fall protection
- Durable storage bag
- Meets applicable OSHA and ANSI requirements

Horizontal Lifeline

- A. Low-stretch rope lifeline for better performance/less deflection
- B. Rope lifeline adjuster to accommodate required length
- C. Shock absorber pack reduces fall arrest forces
- D. Connecting O-rings for greater worker mobility
- E. Reusable roof anchors easy to install/remove quickly

Vertical Lifeline

- F. 50 ft. polysteel rope lifeline
- G. Trailing rope grab that can be attached/removed anywhere along the lifeline

Personal Protection Equipment

- Miller Titan™ non-stretch harness
- 3 ft. Titan™ lanyard with shock absorber pack

Kit Contents

	1 Worker Kit	2 Worker Kit
