

USE OF HONEYWELL RESPIRATORY COMPONENTS AND REPLACEMENT PARTS

Respiratory Protection products are designed and approved as complete systems by NIOSH and other certification organizations. When updating and improving components to these complete systems, Honeywell strives to make the updated components backward-compatible and approved with earlier versions of the affected respirators. However, this is not always feasible. As a result, components approved for one respirator may not be approved for use with, nor operate with, another generation or version of that respirator.

When ordering replacement parts and accessories, it is **critical that customers understand which respiratory system they are using** to ensure that the replacement part or accessory that is ordered is not only compatible with the system the customer has, but is also NIOSH-approved for use with that system. Use of unapproved configurations may result in the respirator not functioning as intended and may cause serious injury, illness, or death to the person using the respirator.

Below are some examples of where different versions of accessories are approved only with a specific Honeywell self-contained breathing apparatus (SCBA).

Accessory	Part Number	Approved Configuration
Twenty/20+ Remote Push-to-Talk (RPTT) Kit (Black Button)*	969083	<p>Each kit below is configured with a Black Push-to-Talk button on the RCS Facepiece Module.</p> <p>964331 Twenty/20+ RCS Kit 964333 Twenty/20+ RCS and SmallTalk Kit 242161 Twenty/20+ RCS Kit (CBRN) 242163 Twenty/20+ RCS and SmallTalk Kit (CBRN)</p> <p>Not approved for use with PUMA hood</p>
		<p>Each kit below is configured with a Blue/Gray Push-to-Talk button on the RCS Facepiece Module.</p> <p>964171 Twenty/20+ RCS Kit 964173 Twenty/20+ RCS and SmallTalk Kit</p> <p>Not approved for use with PUMA hood</p>
Twenty/20+ Remote Push-to-Talk (RPTT) Kit (Light Gray Button)*	964165	<p>964171 Twenty/20+ RCS Kit 964173 Twenty/20+ RCS and SmallTalk Kit</p> <p>Not approved for use with PUMA hood</p>
CommCommand Wireless Remote Push-to-Talk (RPTT) Kit	970025	All CommCommand RCS System Microphones
Hardwired Radio Communication Systems	9643XX Series	Cougar and Panther SCBAs
CommCommand Wireless Radio Communication Systems	CommCommand Half-Duplex	Discontinued (Warrior SCBA only) 242135, 242137, 962775
	CommCommand Full Duplex	TITAN SCBA 252135, 252137, 972775
Buddy Breather Kits	961470	Cougar without COMPASS®
	961148	1997 Panther without COMPASS, on IP hose
	965110	1997 & 2002 Panther, dual fitting
	965119 965122	1997 & 2002 Panther, with SAR check valve For SAR capability, SAR Airline Adapter Kit (does not include SAR male plug)
	921208 965122	TITAN, dual fitting For SAR capability, SAR Airline Adapter Kit (does not include SAR male plug)

*For hardwired RCS Systems, always verify the color of the RCS Push-to-Talk button on the facepiece module before recommending a Remote Push-to-Talk kit. RCS Systems with a Black Push-to-Talk button on the facepiece will only work with an RPTT with a Black Remote Push-to-Talk button. RCS Systems with a Blue/Gray Push-to-Talk button on the facepiece will only work with an RPTT with a Light Gray Remote Push-to-Talk button.

Honeywell offers several resources to help guide you and your customers to the right approved components and accessories:

- **Honeywell Technical Support:** 800.873.5242. Press 2 for Respiratory Protection.
- **NIOSH Approval Label:** Major assemblies and accessories are listed on the NIOSH approval label for each respirator.

Please do not hesitate to reach out for assistance at any time to ensure that you have the right part number when ordering components and accessories for Honeywell respirators used by your customers.
