

UVEX HYDROSHIELD® ANTI-FOG COATING

Maximum protection now on a larger selection

Honeywell Uvex HydroShield® Anti-Fog Coating is now available in a greater selection of Uvex® safety eyewear models and tints to keep you fog-free longer than ever before.

The dual-action HydroShield Anti-Fog Coating lens provides consistent 90X longer lasting fog-free performance* than majority of other anti-fog coatings – even after extended wear and repeated cleanings – and provides 2X greater scratch-resistance**.

**CONSISTENTLY CLEARER.
LONGER. SAFER.**

1. Fog-free **90X longer** and **2X greater** scratch-resistance than the majority of other anti-fog products
2. Permanent coating bonded to the lens means no application or maintenance
3. Hydrophilic and Hydrophobic

*) Uvex HydroShield performance is based on independent lab tests when compared to median test results of other Uvex Anti-Fog Coated products under the EN 166 and EN 168 testing standards.

***) Comparative lens life test performed using a Bayer Abrasion Test method and may vary between environment and application.

*) Under the test for the European EN 166/168 standard, a lens is soaked in water for two hours to simulate the cumulative moisture lenses are subjected to over time from sweat, washing, and extreme work environments. After drying, the lens is exposed to steam and the duration of its fog-free time is recorded.
