Frequently Asked Questions

Q1: Why develop the NEW AirCore front D-ring line of Miller harnesses?

A1: The AirCore front D-ring harness has been developed to provide our customers with a harness that includes a front D-ring option specifically designed for use in a variety of climbing, confined space and rescue applications.

Q2: What are the key features and benefits of the Miller AirCore front D-ring Harness??

A2:

- A smaller front D-ring, compared to similar competitive harnesses on the market, decreases weight and increases work area efficiency.
- An improved cam buckle design that is lightweight, lower profile and easy to operate.

Q3: Is the AirCore front D-ring harness available with steel and aluminum hardware?

A3: Yes, the AirCore front D-ring harness is available in both steel and in lightweight aluminum hardware.

Q4: How many models and variations are available?

A4: All Miller AirCore harnesses (for both steel and aluminum) are now available with a front D-ring with the exception of the ACMB-TB/UGN and ACMB-TB-BDP/UGN (Mating buckle chest strap options).

Below is a list of all available AirCore harnesses with front D-rings:
