

FREQUENTLY ASKED QUESTIONS

Honeywell Miller Titan™ II Harnesses & Lanyards

Enhanced Adjustability for Improved Comfort

Q: What is the difference between the new Miller Titan™ II harnesses & lanyards and the existing Miller Titan™ line?

A: The Miller Titan™ harnesses and lanyards have been a reliable, cost-effective fall protection solution from Honeywell for many years. Several upgrades have been made to harnesses and lanyards in the Titan line in order to enhance this top-selling compliance offering. These **refreshed Miller Titan™ II** harnesses and lanyards are replacing the legacy Titan products.

Q: Why refresh the Miller Titan™ harnesses?

A: For several years, we have monitored customer feedback relating to full body harness comfort and worksite safety. Although comfort and safety can be perceived differently depending on the individual, there were common themes and clear needs from our customers. These include:

- Keep the harness adjusted properly
- Do not let the back d-ring slide down
- Make sure a worker is in the right size harness
- Let a worker be seen on a busy job site
- Keep the labels protected to complete regular inspection
- Make harness size very apparent on the product
- Make sure my product meets the standards
- Achieve comfort and safety while also being economical

Based on this feedback, we decided to refresh our Titan™ harness line to address the above needs. The new economical **Miller Titan™ II** line harnesses now offer enhanced adjustability, improved comfort and increased worksite safety.

The Miller Titan II full body harness is adjustability, comfort and safety at the core.

- Vertical adjuster friction buckles on the shoulder straps, and a newly designed back D-ring make sure that the harness does not loosen as a worker does his or her job. The easy-to-adjust, non-slip design ensures that the harness stays put once it is properly adjusted.
- Oversized ID tags outside the label pack, make it possible for workers to easily identify the size of the harness they are wearing.
- New Hi-Viz orange webbing ensures that a worker is safe and can be easily seen.
- Self-contained label pack encapsulates labels, minimizing loss and damage.
- Meets all applicable OSHA, ANSI and CSA standards, including the new ANSI Z359.11-15 standard.

Q: What are the new features on the Miller Titan II contractor harness?

A: The Miller Titan II contractor harness is designed for more comfort and a better fit with lighter, strategically placed padding that provides optimal airflow.

- The integrated back/shoulder pad offers optimal airflow, allowing for increased comfort while carrying a full load of tools.
- The removable tool belt stays in position when disconnected, even when tools are attached.
- Double slot D-rings have forward positioning that allows for tools to be placed conveniently at your side.

Q: Is the Miller Titan T-Flex™ stretchable harness available with the refreshed Miller Titan II offering?

A: Yes, the Titan T-Flex harness is still available. This harness includes patented Duraflex® webbing that stretches to make sure a worker is both comfortable and safe.

FREQUENTLY ASKED QUESTIONS

Q: What other features are included on the Titan II harnesses?

A: All Titan II harnesses include a back D-ring. There are also front D-ring, side D-ring, and front with side D-ring options available. The Miller Titan II contractor harness includes padding and a removable belt.

Q: Does the back D-ring have any adjustability up and down?

A: Yes, the back D-ring has about 2 inches of vertical adjustability.

Q: How do I access the variable label to obtain all of the harness information?

A: To obtain the harness information in the label pack, firmly grasp the 2-slot chest pad with the Honeywell logo and the webbing. Then, pull them away from each other allowing the back of the label pack to be exposed. Flip the label pack toward you to access all of the labels.

Q: Are you refreshing any other Miller harnesses?

A: No, all other Miller harnesses are staying the same.

Q: Does this refresh extend to any other product lines? If so, which ones?

A: Yes, the Miller Titan lanyards have also been upgraded. The refreshed Miller Titan II lanyards have new Hi-Viz orange webbing.

Q: What are the target markets for the Miller Titan II harnesses and lanyards?

A: The Miller Titan II will be very popular with a wide variety of end-users, including those in both the construction and general industry markets.

Q: Do the new Miller Titan II harnesses and lanyards meet all regulations?

A: Yes, the Miller Titan II harnesses and lanyards meet OSHA, ANSI and CSA requirements.

Q: How is an order placed for the Miller Titan II products?

A: To order Titan II products, contact Honeywell Customer Care at 800.430.5490 (US) or 888-212-7233 (Canada).
