

Touchpoint™ Plus Wireless

Multi-Channel Controller

The Touchpoint™ Plus Wireless is a multi-channel controller with a built-in wireless modem that is designed for integration with RAE Systems by Honeywell MeshGuard intelligent network of connected sensors combined with traditional hard wired sensors.

The Touchpoint™ Plus wireless is the command-and-control element of the MeshGuard system that gathers data and monitors alarms from MeshGuard toxic and flammable gas monitors.

The built-in wireless modem automatically links with MeshGuard monitors, and the controller has built-in security safeguards to resist tampering. The Touchpoint™ Plus wireless does have additional 8 analogue 4-20 mA inputs for combination of traditional wired products and wireless products.
