

CORESHIELD™ DOUBLE

CoreShield™ 
Cut protection made simple

With the new Honeywell CoreShield Double gloves, cut protection in oily environments is transformed – no water or oil on hands, reduced sweat and bad odors, less bacteria on the gloves; just enhanced grip and comfort.

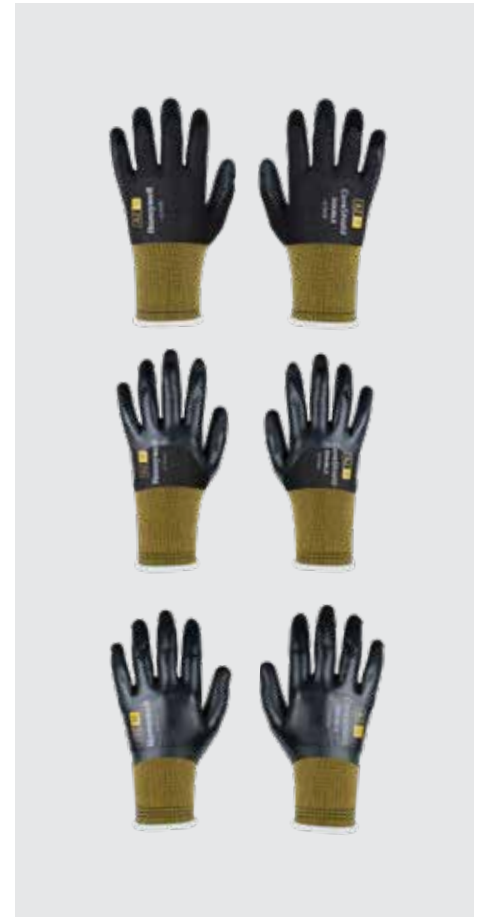

Thanks to their innovative, high-quality materials, the Honeywell CoreShield Double range provides superior cut protection from level A/A1 to D/A4, and gauge ranging from 13 to 18gg. CoreShield Double coated gloves offer efficient grip in extremely greasy environments and improved comfort and dexterity for a wide range of applications.

INDUSTRIES

Machining operations, automobile assemblies, food handling applications, manufacturing.

APPLICATIONS

Please refer to CoreShield™ Double Selector Guide to choose your Honeywell CoreShield™ Double gloves.

FEATURES AND BENEFITS

COMFORT AT YOUR FINGERTIPS

CoreShield™ Double gloves provide enhanced comfort – the 100% liquid-repellent thin nitrile base will keep your hands dry and protected. The CoreShield™ Engineered Yarns underneath the cut-resistant material and the natural fiber textile are skin-friendly and comfortable. They yield softer hands and reduce allergy risks, enhancing moisture absorption. The broad backhand space provides excellent breathability, reducing sweat and bad odors.

TOP LEVEL PERFORMANCE

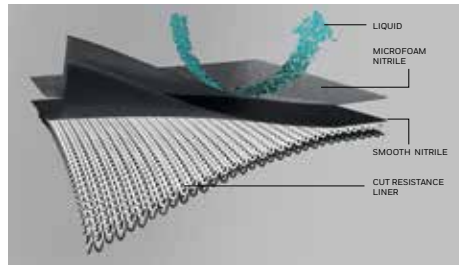

The innovative microfoam coating of CoreShield™ Double gloves assures enhanced grip in most greasy environments while keeping the liquids on the surface of the gloves. They have a 15,000 cycles abrasion resistance, almost double than standard requirement, ensuring excellent durability. CoreShield™ Double gloves are washable – tests have shown that after six wash cycles, they keep the same mechanical performance.

SAFETY ON HAND

Honeywell CoreShield Double range offers complete cut protection from level A/A1 to D/A4. Moreover, their color-coded marking system makes it simple for you to select the correct cut protection for each application, according to your needs. These gloves are always fresh and protect users against allergies; tests have shown a bacteria reduction rate on the glove exceeding 99%. The fully coated models have antibacterial and sweat absorption features.

Honeywell

CoreShield™ enhanced performance double coating
It provides 360° breathability, reliable grip performance, abrasion resistance, reduced hand fatigue and excellent dexterity. It is also water and oil repellent.

Antimicrobial properties*
The special treatment of the surface prevents odors and bacteria growth (available only for the black coated models).

*Product contains biocidal product with active substance Silver nitrate (CAS no. 7761-88-8) in the fabric of the glove to inhibit the growth of odor-causing bacteria.
