NEXSPEX

SPECTACLE KIT

For firefighters that require corrective lenses, the Sperian NexSpex Spectacle Kit offers the ultimate in performance, comfort and optics. The NexSpex Spectacle Kit offers a larger lens area for better peripheral vision and a patented snap-on snap-off system that will not break the mask seal.

The spectacle kit snaps easily into the Survivair TwentyTwenty™ Plus or Survivair Classic facepieces. The kit includes the insert, spectacle and two detachable and adjustable Velcro™ straps.

The Velcro straps can be removed or tucked in to either side of the mask without impairing one's vision or compromising the mandatory tight seal of a face piece. When the user removes the face piece, the spectacles are easily unsnapped from the mask insert and worn as a standard pair of glasses using the two-piece adjustable Velcro straps.

Features

- A larger lens area offers superior peripheral vision
- The kit will not break mask seal when in use
- The kit can be easily installed into the Survivair TwentyTwenty Plus or Survivair Classic facepieces
- The kit can be comfortably worn inside or outside of a the Survivair TwentyTwenty Plus or Survivair Classic facepieces
- A patented snap-on snap-off system allows the spectacles to be quickly removed from the facepiece and onto the user
- Meets all current OSHA regulations
- Meets and exceeds industrial Z-87 safety standards
- Designed by an optician for better optics

What's included in the spectacle kit

- Spectacle front
- Mask insert
- Two-piece Velcro head strap (adjustable and detachable)
- Spectacle case
- Anti-fogging agent
- Color: black

Directions for use with the Survivair TwentyTwenty Plus or Survivair Classic facepieces

- 1) Place the left side of the mask insert into the mask.
- 2) Insert firmly against the left topside of faceplate with right side to follow. The entire insert piece should be in contact with the faceplate with the insert clip centered at the top of the faceplate.
