Introduction
This document is only for Dolphin CN80 NI and CN80G mobile computers marked as certified for use in non-incendive (NI) environments. CN80/CN80G models can be identified by NI markings on the device label verifying non-incendive certification.

⚠️ Warning: Explosion Hazard - Substitution of components may impair suitability for Division 2 Class I, II, III locations.

Out of the Box
Make sure that your shipping box contains these items:
• Dolphin CN80 NI or CN80G mobile computer
• Dust Cover
• Rechargeable 3.85 VDC Li-ion battery*
• Hand strap, stylus and tether
• Product documentation

If you ordered accessories for your mobile computer, verify that they are also included with the order. Be sure to keep the original packaging in case you need to return the mobile computer for service.

Memory Card Specifications
Honeywell recommends the use of Single Level Cell (SLC) industrial grade microSD™ or microSDHC™ memory cards with CN80 mobile computers for maximum performance and durability. Contact a Honeywell sales representative for additional information on qualified memory card options.

* Battery shipped separately for all Dolphin CN80G models.
Mobile Computer Features

CN80/CN80G Models with 6603ER Imager

- Battery Status/Notification LED
- Microphone
- Scan Button
- Speaker
- Power Button
- Aux Button
- Scan Button
- Touch Panel
- Speaker
- Scan Status LED
- Keyboard (model dependent)
- Microphone
- I/O Connector
CN80/CN80G Models with EX20 Near/Far Imager

- Battery Status/Notification LED
- Power Button
- Aux Button
- Scan Button
- Speakers
- Touch Panel
- Scan Status LED
- Keyboard (model dependent)
- Microphone
- I/O Connector
- Microphone
- Speaker
Install a microSIM Card / Install a microSD Card

⚠️ Always power off the computer before attempting to install or remove a card.

1.  
2.  

SIM 1

Phone feature is available only on CN80L1N models.

On all models, when using a UICC card for NFC Secure Element link encryption, install the card in SIM slot 1.

3.  
4.  
5.  

6
**SIM 2**
SIM 2 feature is available only on CN80L1N models.

**microSD**
Format the microSD card before initial use.
Install the Battery

CN80 and CN80G mobile computers use a Li-ion 3.85 VDC, 22.3 watt-hour battery manufactured for Honeywell International Inc. The CN80G battery is packaged and shipped separately from the mobile computer. The CN80 NI battery ships with the mobile computer.

![Battery Installation Diagram]

Ensure all components are dry prior to placing the battery in the computer. Mating wet components may cause damage not covered by the warranty.

Install the Hand Strap

1. Hold
2. Insert and Press
3. Press and Slide

![Hand Strap Installation Diagram]
Charge the Mobile Computer

Warning: Explosion Hazard - Batteries must only be changed or charged in an area known to be non-hazardous. Use ONLY Honeywell battery part number CX80-BAT-EXT-WRLS1 for CN80 NI models or CX80G-BAT-EXT-WRLS for CN80G models.

Risque d'explosion - Les batteries doivent uniquement être remplacées ou rechargées dans un endroit non dangereux. Utilisez UNIQUEMENT Honeywell batterie P/N CX80-BAT-EXT-WRLS1 pour les modèles CN80 ou P/N CX80G-BAT-EXT-WRLS pour les modèles CN80G.

The battery ships with only a partial charge. Before initial use, charge the battery with Honeywell charging device for a minimum of 4 hours. Using the computer while charging the battery increases the time required to reach a full charge.

We recommend the use of Honeywell accessories and power adapters. Use of any non-Honeywell accessories or power adapters may cause damage not covered by the warranty.

CN80 mobile computers are designed for use with CX80 series charging accessories. CN80G models are designed for use with CN80G charging accessories.

Ensure all components are dry prior to mating the computers and batteries with peripheral devices. Mating wet components may cause damage not covered by the warranty.
Install the optional Dust Cover

The dust cover can be used when additional I/O connector shielding is desired.

![Dust Cover Installation Steps]

Turn Power On/Off

The first time you power on the computer, a Welcome screen appears. You can either scan a configuration bar code or use the Wizard to manually set up the computer. Once setup is complete, the Welcome screen no longer appears on startup and Provisioning mode is automatically turned off (disabled).

To turn the computer on:
- Press and hold the Power button for approximately 3 seconds, and then release.

To turn the computer off:
1. Press and hold the Power button until the options menu appears.
2. Touch Power Off.
Sleep Mode
Sleep mode automatically turns the touch panel display off and locks the computer to save battery power when the computer is inactive for a programmed period of time.

1. Press and release the Power button to wake the computer.
2. Drag the lock toward the top of the display to unlock the computer.

Unlock the Dust Cover

Swap Battery Mode for Battery Replacement
You should always place the computer in Swap Battery mode before removing the battery. Swap Battery mode places the computer in a low power state so that the battery can be removed for a short time.

To activate Swap Battery mode:

1. Press and hold the Power button until the options menu appears.
2. Touch Swap Battery and follow the on-screen instructions.
3. Once you replace the battery, press the Power button.
About the Home Screen

To learn how to customize the Home screen, see the user guide.

Navigation and Function Buttons
For button locations, see Mobile Computer Features.
To learn more about how to re-map a button, see the user guide.

Scan a Bar Code
For optimum performance, avoid reflections by scanning the bar code at a slight angle.

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Back" /></td>
<td>Return to the previous screen.</td>
</tr>
<tr>
<td><img src="image" alt="Home" /></td>
<td>Return to the Home screen.</td>
</tr>
<tr>
<td><img src="image" alt="Recent Apps" /></td>
<td>View and switch between recently used apps.</td>
</tr>
<tr>
<td><img src="image" alt="Volume" /></td>
<td>Raise or lower the volume of the speaker.</td>
</tr>
<tr>
<td><img src="image" alt="Scan" /></td>
<td>Press right or left scan button to trigger the scanner.</td>
</tr>
<tr>
<td><img src="image" alt="Aux" /></td>
<td>Use the Key Remap feature in the Settings app to select a button function. For example, the button could be set to initiate the push-to-talk (PTT) feature.</td>
</tr>
</tbody>
</table>
1. Point the computer at the bar code.
2. Press and hold any Scan button. Center the aiming beam over the bar code.

*Note:* Not all bar code symbologies are enabled by default. If a bar code does not scan, the correct symbology may not be enabled or Provisioning mode may be turned off. To learn how to modify default settings, see the user guide.

**About Provisioning Mode**

After completing the out-of-box set up process, Provisioning mode is automatically turned off. Scanning a bar code to install applications, certificates, configuration files, and licenses on the computer is restricted unless you enable Provisioning mode in the Settings app. To learn more, see the user guide.

**Restart the Mobile Computer**

You may need to restart the mobile computer to correct conditions where an application stops responding to the system or the computer seems to be locked up:

1. Press and hold the Power button until the options menu appears.
2. Select Reboot. If prompted to verify, select OK. To restart the computer if the touch panel display is unresponsive:
   - Press and hold the Power button for approximately 8 seconds until the computer restarts.

*Note:* To learn about advanced reset options, see the user guide.
