**Install the Main Battery**

Replace the battery with wrong models may cause explosion. Please make sure to use the battery in accordance with local regulations. Please recycle the battery when possible. Do not dispose it as household waste. Please ensure all kits are dry when connect the mobile device or battery to external devices. Damages caused by connecting wet kits are not covered by the warranty.

ScanPal™ EDA60K comes with a battery in a separate package. Please follow the steps below to install the battery.

1. Press down the battery lock button to unlock the battery;
2. Remove the battery as the arrow on the way;
3. Insert the battery (Insert the non-battery lock button side first in the direction of the arrow.)
4. Press down the back of battery in the direction of arrow, then the battery latch can be locked.

Remarks:

Refer to the illustrated installation steps on the following page.

**Charging / Sync**

**Synchronous Communication**

Open the USB cover of EDA60K; Connect the EDA60K to the computer with USB cable.

## Charging / Sync

### Charging

1. Open the USB cover of ScanPal™ EDA60K ;
2. Connect the ScanPal™ EDA60K to computer with USB cable ;
3. Make sure the replaceable adapter plug plugged into the power adapter;
4. Connect the power adapter to the wall plug and start charging for ScanPal™ EDA60K .

**Get ScanPal™ EDA60K charged for at least 4 hours before using it, subject to your battery models.**

**Using the terminal while charging will significantly extend the time required for fully charged.**

### Remarks:

It's recommended to use Honeywell's peripherals, batteries, USB charging cables and power adapters.

Damages caused by using non-Honeywell peripherals, batteries, USB charging cables or power adapters are not covered by the warranty.

### Warnings:

Please make sure all kits are dry when use the terminal and battery with other accessories.

Damages caused by using wet kits may not be covered by the warranty.

## Aiming Beam

**The aiming beam gets narrower when the terminal gets closer to the barcodes, while it gets wider when the terminal gets farther from the barcodes.**

The smaller the barcodes, the closer the aiming beams should get to the barcodes  
The bigger the barcodes, the father the aiming beams should get to the barcodes

### Beam positions when scan 2D images

## Suspend / Wake Up the Terminal

### Suspend / Wake Up the Terminal

Press the power button and then release (less than 2 seconds)

To wake up the device from sleep mode, press the power button and then release (less than 2 seconds)

### ScanPal™ EDA60K Power Indicator

The status of power indicators in non-charging and charging process are illustrated as below:

Non- charging process	
Off	Battery power is normal
Flashing orange	Battery power is low
Charging process	
Constant green	Charging complete
Flashing green	During charging process, and the charging is about to be completed
Orange	During charging process, and the battery power is still low
Flashing red	Battery is abnormal

## Install Micro Sim Card

1. Power off;
2. Press down the battery latch button to remove the battery;
3. Slide the Sim Card cover and unlock the Sim card in the direction of arrow, then open the Sim Card cover;
4. Insert the Micro Sim Card to the card slot;
5. Reposition the card slot, then slide the card slot and lock the Sim Card;
6. Press down the back of battery then the battery can be locked;
7. Power on.

## Use Scan Engine

**Align the aiming beam with the barcodes, and adjust the angle between the beam and the barcodes to get the best results.**

**The best scan distance relate to scan engine model.**

1. Click the demo application on the interface, and then select Scan demo program;
2. Click Scan on the screen or press the Scan Button;
3. Align ScanPal™ EDA60K with the barcodes;
4. Adjust the aiming beam: in order to obtain the best performance, avoid scanning in a slight angle and slowly move the beam on the barcodes by scanning the reflection of the barcodes;
5. The terminal will beep when the barcodes are successfully decoded, which means the information included in the barcode has been obtained by the terminal
