

## Universal display module with function keys

**Part-No.: 74911B5N**

Universal display module with high-quality LC display for displaying information from the local station/level. With integrated function keys for use by the care service. Equipped with two-row, each 8-digits, alphanumeric LC display with back-lighting. Can also be read off from a larger distance and low ambient brightness. Display of system messages with set presence in the allocated room (alarms, calls and presence etc.) with the highest priority, rolling with several messages of identical priority. Acoustic call forwarding with set presence and the possibility of triggering additional calls. Info mode (display of messages) for the tamper-proof operation configurable, e.g. for use in facility corridors. Display and selection/de-selection of services (interconnections) via function keys. Display of the time, if system time available. Integration of the universal display module into the room bus or bed bus. Upgradable to future system firmware due to forward-looking flash technology.

Equipped with:

2 x 8-digit alphanumeric, high-quality LCDs with back-lighting, readable from a minimum 3 m distance (reading angle 130 degrees) Buttons LED reminder lamp - green - Sound transmitter for call forwarding Button for call function Connection via bed bus / room bus (selectable) Compatibility mode for Clino Opt 99, Clino Phon 99, System 99plus, Systevo Call Ackermann

**Features:**
