

DECT base stations

Part-No.: 790D130

For voice and data signal transfer (up to 4 parallel voice channels) between a base station and the mobile devices.

Data transfer and power supply of the base station are carried out using a two-wire connection (twisted pair cable) from the control card for the base stations (max. distance of 1000 m). Maximum transmission range: up to 50m indoors (based on the composition, structure and materials used) and up to 300 m outdoors. Base station is wired using the provided junction box.

Features:

- 1 base station for up to 4 concurrent speech channels

Operating voltage	48 V DC
Power consumption	1.5 W
Power consumption	1.5 W
Frequency range	1880 MHz ... 1900 MHz
Ambient temperature	0 °C ... 40 °C
Mounting	wall mounting (inside)
Weight	approx. 200 g
Dimensions	W: 150 mm H: 160 mm D: 36 mm (including antenna)

 DECT-Base Station incl. Power cable (2 m) and connection box
