DESCRIPTION
The SMART Position Sensor is one of the most durable, adaptable, and lightweight linear position sensors available in the industry, enabling highly accurate motion control and improving operation efficiency and safety. Its simple, non-contact design eliminates mechanical failure mechanisms, reducing wear and tear, improving reliability and durability, and minimizing downtime.

The SMART Position Sensor is a non-contacting sensing solution for absolute position sensing with enhanced accuracy. It senses the position of a magnet relative to the sensor in one of three available sensing ranges:
- 0 mm to 35 mm [0 in to 1.38 in]
- 0 mm to 75 mm [0 in to 2.95 in]
- 0 mm to 225 mm [0 in to 8.86 in]

These sensors use a patented combination of an ASIC (Application-Specific Integrated Circuit) and an array of MR (magnetoresistive) sensors to accurately and reliably determine the position of a magnet attached to a moving object so that the object’s position can be determined or controlled.

The MR array measures the output of the MR sensors mounted along the magnet’s direction of travel. The output and the MR sensor sequence determine the nearest pair of MR sensors to the center of the magnet location. The output of these two MR sensors is then used to determine the position of the magnet between them.

The SMART Position Sensor is available in both analog output (35 mm, 75 mm and 225 mm configurations) and digital output (225 mm configuration only) for use in control systems requiring an RS232-type interface with a 57.6 kbits/s baud rate.

FEATURES
- Reliable: Non-contact design reduces wear and tear, improving reliability and durability, and minimizing downtime
- Installation takes four simple steps (1: position sensor; 2: drill holes; 3: mount sensor; 4: locate magnet actuator/make electrical connection)
- Rugged: As there are no moving parts within the sensor, Honeywell utilizes unique packaging materials that make the sensor more resistant to vibration, shock, and extreme temperatures
- Air gap of up to 8.5 ±1.0 mm [0.334 ±0.039 in] between sensor and magnet expands application opportunities; variety of output options (analog standard and other RS232-type baud rates) are available, expanding application opportunities
- Accurate: 35 mm configuration accurately measures values down to 0.04 mm [0.0016 in], 75 mm configuration accurately measures values down to 0.05 mm [0.002 in], while 225 mm configuration accurately measures value down to 0.14 mm [0.0055 in] (analog) and 0.0035 mm [0.000137 in] (digital)
- Adaptable: Electronics on board allow for flexible packaging and component compatibility with existing systems
- More than 50% lighter in weight than LVDT (Linear Variable Differential Transformer) technology
- Easy-to-configure sensor array fits virtually any linear movement path
- Self-diagnostics feature can reduce equipment downtime by providing predictive maintenance input
- IP67 and IP69K sealing allows use in many harsh applications
- Qualified for automotive grade EMI/EMC specification provides protection against environmental frequencies (35 mm configuration only)
- RoHS-compliant materials meet Directive 2002/95/EC

POTENTIAL APPLICATIONS
(May not apply to all configurations.)
- Industrial: Valve position, Material handling, plastic molding, cutting and slitting, wafer handling, CNC machines
- Transportation: Engine transmissions, passenger bus level position, truck-mounted crane outrigger position, heavy equipment attachment identification, hydraulic cylinders, marine motors
- Aerospace: Aircraft actuators

PORTFOLIO
In addition to the SPS Series Linear configurations, other configurations include the Arc and Rotary.

</table>

1 Percent linearity is the quotient of the measured output deviation from the best fit line at the measured temperature to the full scale output span.

2 The RS232 digital output is encoded at 0 V to 5 V signal levels. A TTL to RS232 level shifter is required for directly compatible RS232 signals. The digital position output is in two, 8-bit bytes with the high-order byte being first. Each byte is constructed as follows: one start bit, eight data bits, one even parity bit, and one stop bit.

**NOTICE**

- Ferrous metal within a 100 mm [3.9 in] radius of the magnet actuator may affect sensor performance.
- Always use fresh, non-magnetic stainless steel washers when mounting the sensor.

WARRANTY/REMEDY

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship during the applicable warranty period. Honeywell’s standard product warranty applies unless agreed to otherwise by Honeywell in writing; please refer to your order acknowledgment or consult your local sales office for specific warranty details. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace, at its option, without charge those items that Honeywell, in its sole discretion, finds defective. The foregoing is buyer’s sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. In no event shall Honeywell be liable for consequential, special, or indirect damages.

While Honeywell may provide application assistance personally, through our literature and the Honeywell web site, it is buyer’s sole responsibility to determine the suitability of the product in the application.

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this writing. However, Honeywell assumes no responsibility for its use.

WARNING
PERSONAL INJURY

DO NOT USE these products as safety or emergency stop devices or in any other application where failure of the product could result in personal injury.

Failure to comply with these instructions could result in death or serious injury.

WARNING
MISUSE OF DOCUMENTATION

• The information presented in this product sheet is for reference only. Do not use this document as a product installation guide.
• Complete installation, operation, and maintenance information is provided in the instructions supplied with each product.

Failure to comply with these instructions could result in death or serious injury.
