

Load Accessories

Test & Measurement Sensors

DESCRIPTION

Honeywell provides a wide range of accessories for our test and measurement sensor products, which are designed to meet additional requirements for most customer applications.

Accessories available to complement Honeywell's test and measurement load sensors include load buttons, bearing rod ends, pull plates, tongue shackles, and yoke shackles.

PULL PLATE FEATURES

- Load cell attachment allows tension or compression force to be directed at the center line of a load cell through a threaded-center hole
- Attaches to low-profile load cells to give a true hard, flat surface for load cell installation. Recommended to be used, especially when used in tension mode of operation
- Model 41 (ranges from 5 lb up to 200K lb)
- Model 75 (ranges from 5 lb up to 200K lb)
- 3170 Series (ranges from 200 lb up to 200K lb)

LOAD BUTTON FEATURES

- The spherical like shape of the top surface of a load cell where the load is applied.
- Replacement load buttons to fit a variety of Honeywell load cells

BEARING ROD END FEATURES

- Also known as a heim joint (North America) or a rose joint (UK and elsewhere), is a mechanical articulating joint. Used on the ends of a load cell, control rod, steering link, tie rod, or anywhere a precision articulating joint is required. A ball swivel with an opening through which a bolt or other attaching hardware may pass is pressed in a circular casing with a male or female threaded housing attached
- Male and female rod end bearings

If you don't see exactly what you need listed below, or have special requirements for your particular application or operating environment, please contact Honeywell for assistance.

TONGUE SHACKLE FEATURES

- Mechanical piece of hardware that attaches to the load cell. Has a flat extension length "tongue" with a hole where the pin would be inserted. Used as an adapter piece for load cells that would be used in tension loading
- Stainless steel: 5,000 lb to 100,000 lb load rating
- Carbon steel: 4,900 lb to 120,000 lb load rating

YOKE SHACKLE FEATURES

- Mechanical piece of hardware that attaches to the load cell. Shaped like a yoke, sometimes referred to as a clevis attachment. Used as an adapter piece from load cell primarily for when a tension load will be applied to the load cell
- Stainless steel: 5,000 lb to 100,000 lb load rating
- Carbon steel: 4,900 lb to 120,000 lb load rating

Warranty. Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship. Honeywell's standard product warranty applies unless agreed to otherwise by Honeywell in writing; please refer to your order acknowledgement or consult your local sales office for specific warranty details. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace, at its option, without charge those items it finds defective. **The foregoing is buyer's sole remedy and is in lieu of all warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. In no event shall Honeywell be liable for consequential, special, or indirect damages.**

While we provide application assistance personally, through our literature and the Honeywell web site, it is up to the customer to determine the suitability of the product in the application.

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this printing. However, we assume no responsibility for its use.

WARNING

PERSONAL INJURY

- DO NOT USE these products as safety or emergency stop devices or in any other application where failure of the product could result in personal injury.

Failure to comply with these instructions could result in death or serious injury.

WARNING

MISUSE OF DOCUMENTATION

- The information presented in this datasheet is for reference only. DO NOT USE this document as product installation information.
- Complete installation, operation and maintenance information is provided in the instructions supplied with each product.

Failure to comply with these instructions could result in death or serious injury.
