

Honeywell Hawk™ Resolvers

3-Inch Series

Multiple Configurations

Honeywell Hawk™ Resolvers

For manufacturers who need an accurate, reliable, repeatable and durable rotary and angle absolute position sensor for potential use in defense, aerospace, medical and industrial applications. Honeywell Hawk™ Resolvers provide 360° non-contact, angular position sensing and enhanced accuracy (± 7 arcmin) for precise motion control.

Resolvers convert mechanical shaft position to an electrical signal which represents the actual shaft angle. They are variable transformers in which the stator has two phase windings mechanically displaced by 90°. The output consists of two sine waves that are phase shifted by 90°.

Resolvers are typically chosen over electronic sensors (i.e., optical encoders, potentiometers, magnetic encoders/sensors) because they do not contain electronics, so they are not susceptible to performance fluctuations in harsh environments. Resolvers are inherently radiation hardened and offer durable EMC (Electromagnetic Compatibility) performance.

Features

- Single and dual speed operation: 1 and/or 16 magnetic pole pairs
- * Multiple configurations: Pancake (bare and simple housed), fully housed and configurations with rotary transformers
- * Operating temperature range: -50.8 °C to 93.3 °C [-60 °F to 200 °F]
- Accuracy:
 - ± 420 arcsec (1X)
 - * ± 25 arcsec (16X)
- * Excitation frequency range: 800 Hz to 5000 Hz
- * Excitation voltage range: 3 V to 15 V
- Transformation ratio: 0.25 or 1.0
- * Shock: 50 g, 11 ms
- * Vibration: 15 g, 10 Hz to 2000 Hz
- Non-contact magnetic technology
- Endurance testing: To MIL-hdbk-218 (6.2) (1200 hr at 1150 rpm)
- Meets multiple military/aerospace specifications: DO-160D, MIL-STD-202G, MIL-STD-810G, MIL-STD-81963B, MIL-STD-461F; complies with space outgassing requirement SP-R0022

Options

- * Custom trim
- * Custom hub/housing
- Custom connections including custom lead wire, cable, connector on unit or connector on cable
- * Custom redundant brushless version (two independent resolvers within the same housing)
- * Titanium housing
- * Transformer for 360°+ rotation (continuous)

Honeywell Value

- * **Product delivery:** Honeywell's use of the same components for all standard configurations results in its ability to manufacture production-quality standard devices in 12 weeks versus 20-22 weeks many competitors offer
- **Customizable:** Honeywell's manufacturing process and the variety of features available allow customers to customize the product to meet their application accuracy and size requirements

- **Global support:** Honeywell's worldwide presence offers customers immediate product and application support; many resolver competitors offer either support only in their local manufacturing area, or limited support outside of their manufacturing area
- **Engineering expertise:** Honeywell has more than 30 years' experience providing accurate, reliable, and durable resolvers

Potential Applications

DEFENSE

- Electro-optical systems (i.e., systems that transfer information from the optical system to the firing mechanism): provides absolute position feedback of the azimuth and/or elevation angular planes for precise ordnance delivery
- Fire control systems (i.e., weapon systems on military vehicles or vessels): provides absolute position feedback of the azimuth and/or elevation angular planes for precise ordnance delivery
- Gimbals position feedback (i.e., communication pedestals positioned on top of military vehicles): provides absolute position feedback of the azimuth and/or elevation angular planes for a continuous communication stream
- Infrared systems (i.e., military vehicle infrared systems): accurately aims the infrared system at the target

AEROSPACE

- Space vehicle solar panels: Accurately positions the equipment for maximum performance
- Space vehicle antennae: Accurately positions the equipment for maximum performance

MEDICAL

- Oncology equipment: Provides precision feedback of oncology systems to assist in positioning during examinations

INDUSTRIAL

- CNC/precision tooling: Provides angular position feedback of attachments

WARRANTY/REMEDY

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship. Honeywell's standard product warranty applies unless agreed to otherwise by Honeywell in writing; please refer to your order acknowledgement or consult your local sales office for specific warranty details. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace, at its option, without charge those items it finds defective. **The foregoing is buyer's sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. In no event shall Honeywell be liable for consequential, special, or indirect damages.**

While we provide application assistance personally, through our literature and the Honeywell website, it is up to the customer to determine the suitability of the product in the application.
